October 30, 2012, 11:31 am -- [/EPR NETWORK/](#) -- Force 8, a leading home improvement website based in Stockport, has once again shown their dedication to creating innovative products by releasing a range of [arched doors](#).

These doors are different to others on the market because customers can get all the benefits that a traditional composite door offers whilst adding a level of style by choosing an arched door frame.

Dennis Sumner, Managing Director of Force 8, commented;

"We are constantly looking for ways to improve our levels of customer service and offer our loyal customers something extra.

Not everyone wants the traditional styled door which is why we wanted to introduce these arched doors to the market."

Force 8 has a "design your door" feature on their website and this has proved to be popular amongst the thousands of people who visit the website each month. With the addition of the arched door frames, customers now have a wider choice when it comes to choosing the perfect design for their front or back door.

Composite doors are renowned for their qualities including increased security and now with a new style, many customers can add a unique style to their home.

Force 8 offer 12 different door types including Twin Arch doors, 6 and 9 Panel doors, Half Arch, Twin Vertical, Half Glazed and many other types. For customers and suppliers, this means that there is plenty to choose from and Force 8 hopes to consolidate their position as a leading home improvement company by adding to its existing product range which includes [composite bi-folding doors](#).

With showrooms in Stockport and Altrincham, you can see for yourself what great products are available. Pop down to your nearest showroom today and start making some great changes to your home by adding a Force 8 [composite door](#) or maybe some triple glazed windows.
