Staten Island, NY, March 24, 2015 -- /[EPR NETWORK](#)/ -- CPA Practice Advisor has conducted its 2015 review of Command Retail, and the result is a full five out of five star rating, noting its excellent system customization, E-Commerce integration, and managing multiple locations and warehouses. Command Retail scored highly across each category, including Basic System Functions, Specialized Features/Services, Tracking/Reporting, Integration/Import/Export and Help/Support.

“We are very proud to be recognized with such high marks yet again by a trusted source such as CPA Practice Advisor,” said Ian Goldman, CEO of Celerant Technology. “Our vision for Command Retail is to enable our clients to improve efficiency at the point of sale, as well as all aspects of their retail operation. This review – and the high rating – speaks to that vision.”

Within the review, Command Retail was noted for its “complete GL functionality” and “easy integration with FedEx, UPS and USPS, for easy shipping management.” The CRM module was praised for allowing “retailers to offer their customers loyalty cards or club memberships, enabling them to track customer buying habits, while offering loyal customers

special pricing or targeted sales.” The custom reporting options was also highlighted for the ability to track customer demographics and other user-defined data.

Celerant Command Retail provides retailers with a complete software solution that is a single retail platform, including point of sale, integrated E-Commerce/M-Commerce, accounting, business intelligence, inventory control and fulfillment. Command Retail also offer integrations with professional third-party accounting software, including QuickBooks, MAS 90, and Great Plains.
