

# Clonable Private Video Conferences for Everyone

Released on: January 9, 2008, 11:22 pm

Press Release Author: **Zenitum, Inc.**

Industry: [Internet & Online](#)

**Press Release Summary: Palbee offers Private Video Conference pages with permanent URLs for its users. Copy and paste the URL link to participants to give them instant access to the video conference session. Private Video Conferences can also be cloned to appear in other social networking services such as MySpace.**

Press Release Body: Seoul, Korea January 10, 2008 -- **PalBee** announced the release of **Private Video Conferences** at its free online video conferencing service, [PalBee.com](#). Now each registered user of the service has immediate access to a private video conferencing window right on their profile page. Users can invite their friends or colleagues to the page simply by copying the URL link and pasting it into email or chat programs.

If a **PalBee** user would like to increase the visibility of their meeting, the **Private Video Conference** is also clonable. A few lines of Mashup code at the bottom of the page are available to copy and paste into any other web page. This enables **PalBee** users to install a window to the same **Flash-based Private Video Conference** on other web

sites. Furthermore, the windows are linked together so that all participants can be shown in every Video Conference instance at the same time. There is no limit to the number of cloned video conferences a user can make.

The newest version of **PalBee.com** also offers a few more sophisticated social network features such as a friend's list and personal information. It also includes a meeting scheduler, a list of all the recordings a user has created so far, and options to contact the user through **PalBee's** messaging system. Users of popular social networking tools such as MySpace or Facebook should be quite familiar with the look and feel of the page.

### **Combination of Technologies**

**PalBee** combines several features of mobile phones, email, and online messengers into one online application that requires only a copy and paste to use. **PalBee** fills the gap between expensive face-to-face meetings with international associates and the impersonal nature of email. You can use **PalBee** for work - in marketing, sales meetings and conferences. You can use it at school to present or view lectures, school projects, and online tutoring. You can use **PalBee** in your personal life for contacting your friends and family and sharing photos. The applications of **PalBee** are endless.

The **PalBee Team** is committed to developing the application to support our users in their communication and knowledge sharing. They hope you enjoy the **PalBee online service**.
