Press Release Summary: MAGUS: Master of Martial Magic is finally being released to the public after acclaimed reviews by magicians, martial artists and astrophysicists alike!!

Press Release Body: Now that the Harry Potter saga is complete, **Astrophysicist and Magician, Thomas Meseroll**, finally releases copies of his book on '**True Magic**' to public!

Los Angeles, CA April 25, 2008 - **Astrophysicist, Martial Artist and Magician Thomas Meseroll** has released his much awaited novel "**Magus: Master of Martial Magic, The Magician's Primer**" to the public!

The first four-hundred copies were made available to secret magic societies of the world and a few elite martial artists and Astrophysicists. After several requests the author has agreed to make an additional 100 hardbound copies available to the public as well as a more affordable paperback version on **Amazon.com**

Eugene Burger who is on MAGIC magazine's list for being one of the most influential magicians of the twentieth century says, *"It is a fabulous tale incorporating Magic, Martial arts and Eastern Philosophy. I loved it! **Thomas Meseroll** has managed to meld the many forms and philosophies of magic into a marvelous tale of good and evil. I can't wait for the sequel!!"*

Aikido Sensei Jon Ochiai says: *Like the discipline of the martial arts, "**Magus**" is about surrendering to the Path or the Way in one's own life. The story embraces the wonder and surprise that is life through the transformational journey. It is all about reclaiming and discovering one's greatness. Ultimately, "**Magus**" is an allegory of mastery in life. Perhaps, true magic is about discovering one's own power, and enrolling others in their own inherent greatness. The power of the universe begins with being at one with it. The "**Magus**" explores these possibilities in an engaging, and entertaining tale of wonder and adventure.*

Thomas Meseroll is a Director of Engineering in the aerospace industry working as a senior advisor to the United States Air Force's satellite programs. He has performed magic at large venues up to 1000 people and has shared the stage with Teller, of Penn & Teller (who is actually 'speechless' after reading the book...). Now, Mr. Meseroll only performs for charity causes such as the children's Cancer ward at California's Torrance Memorial hospital. In this way he believes his magic and philosophy of life can truly make a difference.

He has also received a patent award from Hughes Space and Communications for his paper on how to use entangled quantum particles to communicate with the past and the future. More on Mr. Meseroll's quantum theory work can be found in **Philip Gardiner's book "Gateways to Other Worlds"** at <http://www.amazon.com/Gateways-Otherworld-Secrets-Egyptian-Underworld/>

"Magus: Master of Martial Magic, The Magician's Primer" is an amalgamation of reality and magic, and is being hailed in the magic community as the 'Real Harry Potter' as it explores real magic!

So, now that the Harry Potter Saga is complete, if you're looking for true magic, this novel may be exactly what you're looking for. A few limited editions are still currently available at www.martialmagician.com or in paperback at <http://www.amazon.com/Magus-Master-Martial-Magicians-Primer/>
