Press Release Summary: Book sheds new light on the separation of church and state

Press Release Body: COLDWATER, MICH. **Remnant Publications** releases **Prophecy's Dr. Jekyll and Mr. Hyde** by university theology teacher and television host **Stephen Bohr**, identifying the United States in Bible prophecy. *"This book is an epic adventure confirming the harmony between history and prophecy, culminating in an end-time drama involving the United States and other key players that may threaten religious liberty as we know it,"* says **Dwight Hall, President of Remnant Publications**. Says the author **Stephen Bohr**, *"Probably no topic has caused more fiery debate among evangelical churches and atheistic skeptics in recent years than the relationship between church and state. One side claims that the two should be divided by a wall of separation, while the other believes Christians and government should team up as partners in the battle against immorality. But who is right...who is going to win... and what does this debate mean for peoples of faith? Will the end come by religious catastrophe as the Bible foretells?"*

Bohr provides in-depth insight into these questions through the powerful lens of the Bible prophecy, detailing the major players—now already active in the world—who will battle it out in the coming crisis of good versus evil. This faith-building study shows you why you can still trust in God’s Word—and it will prepare us to stand firm in the last days!
