Press Release Author: **Blackjack Winning Strategies Calculator
Online Casino Tools**

Industry: [Software](#)

Press Release Summary: BlackjackRadar.com free blackjack basic strategy calculation freeware software discovered that by using the new latest calculated optimal perfect blackjack strategy charts calculated by the software, playing Black-jack on-line online at some online casinos gives the gambling player better odds chances to win the blackjack 21 casino game then the dealer at the internet casino site has.

Press Release Body: As a response to the latest advances in blackjack 21 statistical calculations academic research, The Blackjack radar company released a brand new version of its freeware blackjack perfect playing strategies calculator software for the online blackjack 21 casino game, using the software new optimal playing calculations

methods this freeware product found that some online casino gambling sites have a negative expectation (EV expected value) in the house dealer edge, meaning that the common user who is playing the optimal perfect blackjack 21 games strategy has real winning odds betting edge over the dealer at the casino online.

Statistical data has shown that usually in blackjack 21 casinos game the web casino (the "house") has a big statistical odds edge, even when their user is playing the complete perfect blackjack 21 strategies, at the end of the day the gambling BJ 21 player will lose all of it money, but now, using the latest math combinatorial research, the freeware product **BlackjackRadar**, the black jack basic and advance strategy calculation free software, has demonstrated that a few internet casinos at their blackjack house rules set, lose all of their dealer edge over the normal gambler who will play the newly calculated optimal strategy chart table, making that the casino online gambler actually be a real money winning player by playing just according to the optimum strategy at these casinos online websites.

*"Many casino 21 black jack web site operators do fear the usage of an automated blackjack strategy calculator software by their casino visitors, but they do now understand that it is today a normal practice to do so by a lot of casino online gamblers, This is why these site owners make it hard for any of their users to completely understand their house blackjack rules set, The newly published freeware BlackjackRadar software product has now mapped the safest and most trusted net casino internet sites on the web and studied all of their black-jack 21 dealers edge and their casino house rules and finally produced a very easy to understand results of perfect blackjack playing strategy table and charts for each one of the on line casinos, letting now everyone be able to just play an optimal perfect blackjack 21 strategy at any of these online casinos" says **BlackjackRadar director Greg Wagners**.*

The new **Blackjack Radar Calculator** found internet online casinos where the online gambling player has a real positive edge over the deal at the internetcasino. The "Casino Edge", "Dealer Edge" or "House Edge" is the actual chance percentage that the casino dealer has to win over the online player, even when an online gambling player is playing a perfect blackjack strategy. usually the House Dealer Edge can go up to 5% in favor of the dealer at the onlinecasino, which really means that in the long run the virtual casino will always have many more BJ 21 winning sessions than any common player and that is exactly how the virtualcasino makes its gambling money profits.

BlackjackRadar as a really unique and highly innovative free gambling software product for calculating the optimal blackjack 21 strategy and winning odds calculations for each and every possible blackjack hand, and it instantly recommends how the BJ player should play in each case. **Blackjack Radar** always calculates the winnings odds based on the specific blackjack game rules set of each and every online casino, in the software user interface, the software user can now choose the online casino site name in which he wishes to play blackjack and the specific black jack game name at that Internet Casino website and then by clicking the calculation optimal strategy button, he will get immediately the right strategy chart showing him exactly what action he should be taking for each black jack hand he gets. In its newest lab research and calculation methods, the **Blackjack Radar software** found several Online Casinos with a true positive casino BJ winning expected value for gamblers, which means really that the blackjack web casino expected value (EV) for the dealers house edge is negative so the blackjack player has much more statistical chances to win against the blackjack dealer at the net casino itself, However, **Greg Wagners** also says that this situations are usually very rare in the on line gambling industry and by identifying these online casinos and the online poker rooms which use these blackjack rule sets for their pokerrooms blackjack side bets game, can bring a huge advantage to their online blackjack players.

"Once the online casino blackjack players are getting this free software tutoring product, many begin to finally realize that this is a once in a lifetime blackjack 21 learning course education opportunity to truly make some good and big changes in their usual way of playing the blackjack online casino games and start winning at blackjack games constantly" says Greg Wagners.

This **BlackjackRadar Strategies calculator** product is now being constantly changed and enhanced with all of the new discovered perfect blackjack play strategy winnings systems math methods and the latest research on odds probability calculations.

The product also tries to list many of the upcoming on line casinos 21blackjack tournaments, the black jack 21 nodeposit needed freerolls at the online casinos schedule, and the blackjack21 casinos deposit and signup bonus promo codes offers and sign up bonuses promotional exclusive offers along with the sign up and 1st time deposit bonuses for many new blackjack players in black jack online rooms over the web.

*"We are very pleased to now offer this blackjack strategy calculator software freeware casino gambling tool available to all on-line blackjack21 casinos players for free," said **Greg Wagners**, "What is very nice about this new black jack Radar Perfect Strategies Calculator freeware software is that it is now always ready to help the user while he is playing casino blackjack online. We are confident that many users will now find this highly innovative blackjack helper tool solution very easy to use while being highly effective in the learning of how to play blackjack the right winning way"*
