Press Release Summary: Taste Trips, the original UK seller of Miracle Berry Tablets, soon to be offering new Taste Modifying Products.

Press Release Body: **The Miracle Berry or Miracle** fruit has been a big hit all over the world.

This was initiated by an article in the New York Times, which featured a flavour tripping Party on a rooftop.

Synsepalum dulcificum, as it is scientifically named contains a rare protein which binds to the tongue. When anything acidic (sour and bitter food/drinks) passes over these, they trigger the sweet receptors on your tongue.

The sensation is very unique. Even Vinegar and Grapefruit actually tastes sweet.

Now, a company in Taiwan is producing **Miracle Berry Tablets**. Freeze **Dried Miracle Fruit**, compressed into Tablet form.

The small pills are placed on the tongue and allowed to dissolve slowly. The same effect (if not more potent) occurs as it does with the fresh fruit.

Taste Trips (www.tastetrips.com) was the first company worldwide to begin shipping English Packaged **Miracle Berry Tablets** to the world. Taste Trips are now in the process of discussions for new and improved Taste Modifying Products, including **Miracle Fruit Gum** and **Miracle Berry Strips** (Tongue strips).
