

# Happy Halloween – How to Make Your Halloween Party a Success

Released on: October 28, 2008, 5:20 am

Press Release Author: J. Koch - [www.halloween-party-music.com](http://www.halloween-party-music.com)

Industry: [Entertainment](#)

**Press Release Summary:** On October 31 it's party time again. Anyone planning a Halloween party should soon tackle the task, as ghosts and other creepy fellows are already waiting in the wings for Halloween 2008. In order to make your Halloween party a scary success, we have compiled the best ideas for Halloween.

Press Release Body:

## **Light: Darkness and Scary Effects**

The most important instruments to liven up the creepy party are light, sound and a scary decoration. Certainly, the room has to be darkened before green and orange bulbs can create an eerie atmosphere. Black light as known from discotheques is particularly suitable as well. When choosing the lamps' position, you should make sure to have primarily scary details of the decoration spotlighted. In addition, lights strings create a special atmosphere, particularly ones with Halloween motifs

such as pumpkins and bats. Black light lamps, colored bulbs and light strings are available in every well-stocked DIY store.

### **Mystical: Candlelight**

For those who like it even more mystical, candles are a good choice. However, you should pay particular attention to corresponding precautions then in order to avoid fires.

### **All-important: The Right Halloween Sound!**

Imagine a horror film without corresponding music. Most flicks appear funny rather than scary then. Many scientists also claim that the large number of apparitions results from the effect of low-frequency oscillations. Therefore, it is crucial to provide for the right sound in order to put your guests into the right mood. Particularly at the beginning of the party, a corresponding soundscape sets the spooky mood for the visitors.

### **Halloween Sound Effects from the Internet**

By the way, you can find the right sound for this occasion on the internet: Visit [www.halloween-party-music.com](http://www.halloween-party-music.com) for the **Halloween Party Soundtrack** with scary effects that will really send shivers down your spine as well as for the **Halloween Danceparty CD** with groovy dance tracks especially for Halloween. Those who decide quickly can also download the CD in mp3 format at short notice. Besides: our readers even save 5 dollars with the reader voucher 23cfA49cD13.

**Turning the Living Room into a Haunted Castle** – The Right Decoration How can you decorate a Halloween party easily, quickly and inexpensively? Creativity and some manual skills are advantageous here. But: no scare-mongering! With the help of the following tips, anyone can create the desired ghost house or tomb atmosphere.

### **A Hollowed Pumpkin – the Classic**

Obviously, the classic is the hollowed pumpkin. You can find numerous carving patterns for the typical "pumpkin grin" and tasty recipes for what remains on the internet.

### **Easily Create Cobwebs on Your Own**

By means of a hot-melt gun, you can easily create your own cobwebs. For what exasperates a handyman, will suit the Halloween fan just fine. Simply apply glue dots on insensitive places and pull the hot-melt gun more or less quickly away from the glue dot so that fine threads

are forming, slowly floating down on the object to be cocooned. The whole thing will look as if nobody had cleaned up there for years – just like in a real haunted castle! Cobwebs for windows, doorways and even for the decoration of the buffet can easily be created as well: simply use a waterproof pen to paint a cobweb on plastic wrap and stick it on the window or attach it to doors.

### **Decoration of Walls and Windows**

The famous Halloween symbols are always an asset, such as pumpkins, bats and ghosts as well as everything reminding of an old ghost house: ornamentation around the doors, stones in the corners and many other features can easily be created by means of old cardboard boxes and a little paint.
