Press Release Summary: A leading provider of manufacturing execution software for discrete manufacturers has produced an online video and whitepaper explaining the benefits of a 'paperless' shop floor.

Press Release Body: Eden Prairie, Mn Nov. 26, 2008 – **HighJump Software**, a global provider of supply chain execution solutions, has announced the availability of an online video and downloadable whitepaper explaining the benefits of its manufacturing execution system, **HighJump™ Manufacturing Advantage**, at each stage of the manufacturing process. The video and whitepaper are available at http://www.highjump.com/MES_video/.

A manufacturing execution system, or MES, enables real-time management and visibility of work-in-progress on the shop floor, resulting in improved product quality, reduced costs and enhanced responsiveness to customer demands.

Following eight key steps in the manufacturing process, the **HighJump Software MES** video reveals how manufacturing execution systems can really make a difference in day-to-day operations. Viewers learn the solid operational benefits of discrete manufacturing software and a paperless shop floor.

"Many people wonder what an MES really is and what it can do. This new video and whitepaper explain in an easy-to-understand, step-by-step format how manufacturing execution software can really make a difference in day-to-day discrete manufacturing operations," explained **Chad Collins, Vice President of Marketing and Strategy, HighJump Software.**

To watch the new video on manufacturing execution software from **HighJump Software**, or to download the free whitepaper report, "**How a Manufacturing Execution System (MES) Can Transform Your Operation,**" visit **HighJump** at http://www.highjump.com/MES_video/.
