Press Release Summary: TreasureonNet reveals why their scratch card prizes are better than other scratch card and lottery prizes

Press Release Body: Nicosia, Cyprus 14 December, 2008 – There is a tendency among people playing scratch cards and other instant win games to focus solely on the sum of the prizes that they can win, with the bigger the better, while focusing less on what the odds of winning these prizes are.

While lotteries usually offer huge sums of money for the jackpot prize, with a range of smaller easy win prizes, the odds of winning these prizes and in particular the jackpot prize, are very low. Shop-bought scratch cards tend to offer higher odds of winning than lotteries although the prizes are generally much smaller than lottery prizes. Unlike a lottery where there can be several winners of a jackpot which means that the prize can potentially be shared between several people, If you win the top prize in a scratch card game, you know exactly how much you will receive There is a new trend in scratch and win cards to offer more expensive tickets which can cost as much as \$20 or \$30 with prizes in the millions of dollars but these carry a very low probability of an easy win. As scratch cards sold in shops are sold as part of a series, there are often instances where the prizes for the

scratch cards being sold have actually been won, without the buyer being aware of this.

TreasureOnNet's scratch cards on the other hand allow the player to choose the price of the ticket and the subsequent payout of their easy win prizes, depending on how many treasure chests they find. Unlike with lottery tickets, the more expensive the scratch card, the higher the prize is which is a much fairer than the lottery system. Every TreasureOnNet scratch card contains all the items needed in order to win easy money, so that in every game, there is a big chance to win the instant cash prize.
