[Las Vegas Invisalign](#) Orthodontics patients in Las Vegas, Nevada now have something amazing to smile about. Dr. David Alpan and Aesthetics Orthodontics offer a virtually invisible way to get the straighter teeth and beautiful smiles they've always dreamed about—with no brackets, no wires, and no hassle. One of the most convenient and comfortable teeth straightening options available today, the **Invisalign** system lets each patient keep her orthodontic treatment to herself, using a series nearly undetectable aligners to produce a dazzling smile and the confidence she craves.

Affecting over 75% of the population in the United States, malocclusion, or the misalignment of teeth, is one of the most common reasons that patients seek dental care. The metal **braces** that have been used for years to treat malocclusion are difficult to care for, require restrictions on the patient's diet, can be uncomfortable to wear, and are quite noticeable.

In contrast, the **Invisalign** system consists of removable clear plastic trays that are both comfortable to wear and convenient to care for. These aligners gently shift the patient's teeth, over time, into the smile he's always wanted, with none of the bother of **braces**. Other types of invisible **braces**, like those worn on the backs of the teeth or those made of ceramic rather than metal, can certainly be less noticeable than traditional **braces**, but only **Invisalign** offers the patient complete freedom when it comes to what he eats and how he brushes—the trays are simply removed when necessary.

**Invisalign** aligners are created just for the individual patient, based on a custom treatment plan. Each set is worn for two weeks, and then replaced by the next set in the patient's personalized series. As the patient works her way through her series of aligners, she begins to see positive changes in her smile. The aligners straighten teeth over time, ultimately leaving the patient with the beautiful smile she's been waiting for.

A leader in the field and a top [Las Vegas Invisalign orthodontist](#), Dr. David Alpan has been a certified **Invisalign** provider since 1999. Since 2001, Dr. Alpan has worked with Align Technology, the maker of **Invisalign** to train other **Invisalign** dentists in the use of this highly effective and popular tooth straightening method. To date, Dr. Alpan has trained over 6,000 **Invisalign** providers, and he currently works as a study club leader for new **Invisalign orthodontists**.

Dr. Alpan is a 2009 Elite **Invisalign** Premier Provider and a member of the **Invisalign** Century Club, an honor awarded to the top 100 **Invisalign** providers in the United States. Dr. Alpan and his team at Aesthetics Orthodontics work hard to stay abreast of the latest advancements in the field in order to bring their patients the most comfortable and effective treatments modern orthodontics has to offer.

In addition to the Las Vegas office, Dr. Alpan has locations in Beverly Hills and Los Angeles.

His team at Aesthetics Orthodontics is committed to delivering comfortable, effective orthodontic treatment in a pleasant, caring environment. Along with **Invisalign** and other treatments for malocclusion, Dr. Alpan and his team provide TMJ/TMD treatment and treatment for Muscular Skeletal Disorders (MSD) to help provide relief for patients suffering from headaches, neck and back pain, and other neuromuscular symptoms.
