January 07, 2013, 9:41 am -- /[EPR NETWORK](#)/ -- In the continuous effort to provide our hotel partners and guests with the best services and most advanced functionality, Bali Hotel Guide would like to announce the completion of successful integration of our Hotel Extranet System with SiteMinder's market leading Channel Manager.

Bali Hotel Guide is dedicated to building a 'destination site' featuring an extremely high quality user experience and the most efficient application interface possible for the Bali market. In response to the acute need for a single portal that features the widest range and most extensive collection of original, practical and up-to-date Bali hotel and travel content and information, Bali Hotel Guide has expanded its technological capability to accommodate real-time pricing and availability data coming from hotel partners using the SiteMinder Channel Manager system.

Now that the technical implementation is complete, we would like to welcome those properties in Bali using the SiteMinder Channel Manager to join us in seamless integration. With this new advance, all the most important information regarding hotel rates and inventory can be shared directly to our Bali Hotel Guide extranet system via the SiteMinder Channel Manager.

This will help our hotel partners attain greater and more efficient sales operation while maintaining market integrity and unity of presentation. Furthermore, hotels can avail themselves of maximum promotional effect and wider exposure through their listing on the Bali Hotel Guide website ([www.balihotelguide.com](http://www.balihotelguide.com)).

This valuable service reduces the amount of time, money and effort hotels must spend managing their online presence and is offered for free and at no risk to our partners. Bali Hotel Guide has a commitment to evolving and supporting the hoteliers, resorts and villa owners in Bali looking to expand, focus and optimize the bookings received via the Internet.

With the growth of the Internet and the Bali tourism industry, it is clear that local accommodations of all sizes need to use their energy and resources in the best way possible. Therefore, Bali Hotel Guide has taken steps to develop a partnership with SiteMinder in order to help the Bali hotel market more efficiently access the large volume of potential guests seeking useful information and full-service assistance for their Bali vacation.

Bali Hotel Guide would like to invite all users of the SiteMinder Channel Manager to connect to us right away. We ask that hotels contact us at [info@balihotelguide.com](mailto:info@balihotelguide.com) to receive free support integrating the systems. You may also speak to your SiteMinder representative for help or go to <http://www.siteminder.com/> and sign up for a free trial of their software.

The year 2013 promises to be an exciting period for Bali Hotel

Guide and its hotel partners. Bali Hotel Guide has already laid out plans and begun development on several big, new, market moving improvements scheduled to be announced in the first part of the New Year. Please join us for an all-new, highly valuable hotel supplier-internet portal relationship.
