Winsford, UK, January 07, 2013, 10:00 am -- /[EPR NETWORK](#)/

-- It isn't just men who suffer with hair loss and their hair thinning, women also suffer and the effects of this can have a psychological effect on all women. Peak Nutrition, providers of a range of health and well-being supplements, may have the answer with Nourkrin Woman.

As a natural food supplement, Nourkrin tablets contain only natural ingredients such as Acerola Cherry Extract, Silica Kieselguhr and Horsetail extract which means there are no side effects to worry about. There are 4 stages to taking the product that take approximately six months.

Stage 1 is the slowing and stopping of hair loss; stage 2 is the process of strengthening the existing hair; stage 3 is when it promotes the growth of dormant hair and the final process involves the strengthening of the new hair.

Andrew Skipper, Managing Director of Peak Nutrition, said:

"We know that hair thinning and hair loss can really affect a woman's confidence so we wanted to show that there is something customers can do about it. We hope Nourkrin Woman can not only give them some hair back but their confidence and self-esteem back. Although it has a new name, it is still the same great product!"

Nourkrin is suitable for both men and women and whilst there are no guarantees in life, the product has been clinically proven to promote the growth of existing hair and stop hair loss. Peak Nutrition also has other hair loss products available such as the Hairmax Lasercomb which has proven to be extremely popular recently.

Those that have used the tablets have seen some fantastic results and if there are people out there that are suffering with hair loss, why not give Nourkrin Woman a try; you may be surprised with the results.

Peak Nutrition also has a range of other products available to buy such as Pilfood, Nanogen and Orthomol, all available at www.peak-nutrition.co.uk
