January 22, 2013, 6:32 am -- [/EPR NETWORK/](#) -- The winter is here and the snow is coming in large amounts and Splash and Relax have a full range of sledges ready to go. This looks like being a great year for those that like to make the most of the cold weather and good snow seems to be around for almost all of the country. Snow comes in various amounts and falls can melt as soon as they come but this year the cold weather never seems far away and the possibility of good sledging weather is quite high. Sledging is still one of the great British leisure activities which is only restricted by the weather of the British Isles but this year looks to be a good one and many areas not used to experiencing snow look like getting the opportunity to get out the sledges.

Splash and Relax have a sledge for any person who likes sledging from plastic trays to wooden sleighs. These sledges are all of good quality and the choice is large and the prices are such that there is something to fit every ones pocket. The trick is to get the sledge before the snow comes so that it is ready for the weather when it comes. If purchasing is left too late then either the shops are sold out or the snow makes a trip to the shops a difficult and sometimes dangerous exercise.

There is a super range of [wooden sledges](#) which can be supplied by Splash and Relax which cover most requirements, all that is needed is an examination of the Splash and Relax web site and once the decision

is made a simple order can be placed and the sledge will generally arrive within 48 hours. The typical wooden sledge is a version of the Austrian type sledge where the runners are supported by double leg system with the rider sitting on the wooden table seat supported by these legs. The sledge is excellent for control going downhill and is extremely fast. The wooden sledge seems to have been around forever but it is still as good as it ever was and is still as popular as ever.

Splash and Relax - <http://www.splashandrelax.co.uk> - have realised that for many people space and storage is always a problem, particularly if they are of the wooden variety which have height as well as length and that storing a sledge can take up space and there are years when it may not be used at all so storage becomes more difficult. To compensate for this many of the Splash and Relax sledges have been built so that the legs and runners fold so that the sledge can be stored flat. It can also be carried flat which makes transporting the sledge to and from the slopes so much easier. Some of the top of the range sledges have beautifully carved models, which are shaped like their Austrian and Swiss counterparts and look quite stunning. The prices are excellent with prices ranging to a maximum of around £80 for a stunning traditional sledge.
