## **Center for Scholastic Inquiry Kick offs Temporary Price Break for Research Event in Scottsdale, AZ**

Granite Falls, MN, February 12, 2013, 4:30 am -- [/EPR NETWORK/](#) --  
On April 17-19, 2013, The Center for Scholastic Inquiry will host an international [academic research conference](#) in Scottsdale, Arizona — an event to inspire, encourage, and unite thought leaders and new thinkers in the fields of education, business and behavioral sciences. For a limited time, CSI has reduced the standard registration rate by 50%. According to Dr. Tanya Yerigan, CEO, "The Center for Scholastic Inquiry wants as many attendees as possible to take advantage of this unique opportunity that fuses pure research with powerful professional development. People who register during the 50% off promotion will also be offered a 50% discount on an advance manuscript review in the event that they would like to publish their research in one of CSI's [academic journals](#)."

The academic research conference is a forum to connect, educate, and motivate attendees towards discovery and evidence-based professional practice. Hosted and sponsored by CSI, the research and professional development event will bring together diverse and promising perspectives on best practice while providing a platform for emerging

scholars, practitioners, and professors in the fields of business, behavioral sciences and education to come together and take action. Yerigan said, "Our goal at the Center for Scholastic Inquiry is to elevate professionalism and evidence-based practice by fostering academic research, stimulating scholarship and endorsing thought leadership."

---

The conference presenters include professors, private sector practitioners, doctoral-level learners, and higher education administrators who will be sharing insights into contemporary research, practical implementation strategies, operationalization of findings, and new trends in education, business and behavioral sciences.

The keynote address for the conference will be given by Dr. Bruce Locklear, a preeminent authority on a broad range of issues including leadership, evidence-based practice, technology initiatives and change agency. Dr. Locklear is a nationally recognized, award-winning leader whose

expertise is evident in his willingness to champion innovation and ability to inspire organization-wide change.

The conference will be host to over 100 presenters from more than 50 institutions. An example of some of the diverse research topics being presented during the three days of breakout sessions include media choices and teaching experience in online courses, after-school tutorial programs for urban students, an examination of the turtle trading system, using applied research to develop innovative undergraduate curriculum, understanding of corrective feedback on speech production in English, strategies to improve math achievement of academically deficient students in an urban school, the impact of cyber learning technologies and curriculum, instructional impact on achievement of economically and learning disadvantaged students, and China's gradualism approach to systemic transformation.

The conference will also include a variety of networking and training events, allowing attendees to boost collegiality, connectedness and professional development. There is a conference-eve reception on Tuesday, April 16, a campfire evening event on Wednesday, April 17, a members-only supper event on Thursday, April 18, and an afternoon

awards ceremony for Best Presentations and Best Papers on Friday, April 19. There is also a coaching clinic lunch session on Thursday and a round-table intensive lunch event on Friday. Attendees will be able to sign-up at the conference to participate in these special sessions offered to enhance their skills regarding navigating the academic research publication process and exploring the ramifications of effective leadership skills.
