DENVER, CO., March 18, 2013, 12:44 pm -- [/EPR NETWORK/](#) -- Holistic health and wellness expert Steve Carney has relaunched his health website, EndSicknessNow.com. The newly revamped site has also reached a milestone with its 75th article. The site's mission is to help readers and clients reach optimum health and longevity, a mission inspired by Steve's own battles with serious health and life obstacles.

"After a terrible childhood illness, I spent 20 years researching health, nutrition and disease prevention and treatment. I use a unique blend of consulting, support and encouragement to help each client achieve their health goals. Common health problems, such as high blood pressure, high cholesterol, excess weight, pain and inflammation often improve in a few weeks. Client's enjoy more energy, stamina, and better sleep," Steve explained.

End Sickness Now is an expert source for optimum health and disease prevention. Steve provides the latest research and newest breakthrough methods for easy weight loss, preventing and treating health conditions, and improving mood. The site also helps to expose numerous nutrition, health and disease myths perpetrated by the medical industry and the media.

"The constant flow of myths and misinformation creates confusion. Decades of nutrition and medical myths have harmed people's health, along with their chances to live a longer life," Carney stated.

Steve is a Certified Nutrition and Fitness expert, and Professional Life Coach. For those who wish to take their first steps toward optimum health and wellness, contact Steve for more information about a free, 30-minute phone assessment.
