Industry: [Construction](#), [Industrial](#)

Derby, CT, March 11, 2013, 9:06 am -- /[EPR NETWORK](#)/ -- A Quick Pick Crane & Rigging has been successfully growing in the [Rough Terrain Crane Rental](#) market. Currently, the company owns (1) 80 Ton rough terrain and (2) 50 Ton rough terrain cranes, but has the ability to acquire more and/or larger sizes for long term jobs.

Rough Terrain Cranes work well on heavy highway and bridge jobs, jobsites requiring rebar and concrete pours, and steel erection. Compact design, flotation tires, 4 wheel drive, and crab steering allow these cranes to work on tight jobsites with mud, rock, dirt, or snow. The company has also done work on cell sites and set a number of modular homes with the cranes because of harsh jobsite conditions.

A Quick Pick Crane & Rigging Service is based in Derby, CT, services the CT, NY, MA, RI areas, and provides boom trucks, mobile hydraulic, rough terrain, tower, and crawler cranes for rent to the construction industry. Their rigging division provides HVAC/mechanical rigging, machinery moving, sculpture/artwork moving. The company also provides ancillary trucking and industrial storage for their crane and rigging customers.
