Industry: [Industrial](#)

April 09, 2013, 11:36 am -- [/EPR NETWORK/](#) -- Express Cleaning Supplies have been supplying high quality pressure washers for a long time and the range covers all different requirements required by households and industry. This range keeps getting better and Express Cleaning Supplies is pleased to promote the newest addition to the range in the form of the Karcher HD 5/11 C Pressure Washer. This new [pressure washer](#) is a compact machine with a number of new features that has turned a small machine into an excellent piece of cleaning equipment. Aimed at the lower end of the market this machine is very reasonable priced but has a great workload potential.

Express Cleaning Supplies is pleased with the upright, space saving designed machine, which has a retractable handle that retracts and then collapses to help with storage. This is an ideal machine for the place with little storage space or for the outlet where the machine has to be transported on a regular basis. The overall weight of the [Karcher HD 5/11 C Pressure Washer](#) is only 19 kg so single man handling is more than possible.

Operating the Karcher HD 5/11 C Pressure Washer is ideal as the machine produces a flow rate of 500 litres per hour of water at a pressure of 115 bar, uses a standard 240 volt power supply and is powered by a 3 piston axial pump, with hardened steel pistons. This design configuration guarantees a smooth and quiet operation but it is extremely effective and powerful in its cleaning operation. Although quite a small machine Express Cleaning Supplies notes that it is fitted

with an excellent chemical metering system, which enables the chemicals and detergents to be added quickly, and accurately at the correct rate. The designers of the Karcher HD 5/11 C Pressure Washer have taken note of the problems with chemical damage to the pressure washer's pump and have designed the pump with a brass cylinder head to make sure the cylinder head is resistant to the detergent usage.

[Express Cleaning Supplies](#) believe that the Karcher HD 5/11 C Pressure Washer is ideal for a range of companies who require regular pressure washer cleaning. The lightness and portability of the machine makes it useful for operations like fleet cleaning where the vehicles are brought in on an "Ad hoc" basis or on a planned basis and can receive a regular washing. The farm or animal shelter is another obvious user where muck and slurry must be cleaned out on a daily basis. This machine will do that job quickly and very well in a very short time. Fish, meat and vegetable markets can be totally cleaned as required with a minimum of fuss and cost. In places where detergents and disinfectants are required the machine can work for long periods between refilling. The overall cost of the machine at less than ?400 means that many companies who might only have irregular but essential usage can afford such a machine. Express Cleaning Supplies welcome any enquires and invite the reader to examine their web site or contact them directly to see if the Karcher HD 5/11 C Pressure Washer is suitable for there operation.
