April 09, 2013, 11:44 am -- [/EPR NETWORK/](#) -- The Door Store in Leamington Spa are now supplying the latest JB Kind Eco Grey Flush range of internal doors and are pleased with the quality and the great design of these new doors. This is quite a different design and the flush door gives an excellent finish and gives very clean lines to the door. The grey colour gives a completely different look to the door and makes it an ideal accompaniment to a house with a modern design and the finish is improved by being finished with a wood grained effect. JB Kind has developed a completely new painting system which gives a flawless wood grained finish at a fraction of the cost of natural veneers. This helps to reduce the cost of door by a very significant amount and The Door Store is able to pass all of these savings directly to the customer.

This revolutionary painting system has been seen by The Door Store as a major advancement which has achieved superb results in the market. The prices of these doors are very competitive and this is due to the change in construction and in particular the new painting methods. The doors themselves are made in a cellular fashion with a solid Oak wood core. The range consists of the standard JB Kind Eco Flush [internal door](#) with a completely flat face and also the glazed version which has an almost full length glass insert in the middle of the door. JB Kind also produces a fire door in the same construction.

The Door Store takes a great deal of care in finding the right sort of door that will increase the finished range of its products and the JB Kind Eco Flush range is one of the new ranges which has been picked

to give the house owner a new dimension for the design of the building. The Eco Flush door gives a flat surface on the internal door with no blemishes but a great wood grained finish and allows the house owner to design the interior of the house with this in mind. The range of [grey flush doors](#) allow a designer to use their imagination and create a good modern design which will encompass both, the internal door, its frame and also the door furniture and the fascinating grey colour. The use of the glazed Eco Flush door will allow light to be introduced from a different source whilst enhancing the door appearance.

The cost of the glazed door is around £244 per door whilst the flush door costs a very modest £77 per door and there is a 5% discount when 10 or more doors are purchased. [The Door Store](#) - <http://www.the-door-store.co.uk> - has a superb range of door furniture, which will match the Eco Flush Internal Door. This range includes modern simple stainless steel material designs, which compliments the clean lines of the flush door and there are some designs which encompass the use of materials like satin nickel or brass. A quick look at the web site will give the customer of just what is possible and contact by email or phone can be very helpful.
