May 08, 2013, 8:59 am -- [/EPR NETWORK/](#) -- Ace Sheds have developed a great range of differing wooden buildings from the common or garden shed to the summerhouse range and finally to the full purpose built self design building. All these buildings have the quality and design characteristics, which make them superb for the job they have been built to do and at a price, which is excellent, and at a fraction of what any brick or breeze block building would cost. As the name suggests Ace Sheds started life as major shed builders and whilst they supply other buildings the shed market is still a major part of the business of [garden sheds in Kent](#).

Ace Sheds tailor make each shed to satisfy a certain part of the market and one of the best sheds that is produced is the Reigate Security Shed which is one of the strongest sheds on the market. Shed crime has become a major problem and the losses from these buildings have been very high over the last few years. This has been mainly due to the fact that criminals have not had to bring along tools to break in and therefore cannot be charged with possession of such tools, also the standard shed is usually at the bottom of the garden and in the quietest place and the darkest place so that the burglar can break in without waking the family or the neighbours.

Ace Sheds have taken this on board and produced a superb shed that is ideal for this application the [Reigate Security Shed](#). The frame is a 52 mm x 25 mm with extra diagonal supports for extra strength, the cladding is tongued and grooved boarding throughout and the floors and the roof are also made of 12 mm tongued and grooved boarding.

The windows are small and very high in the building, the standard fitting comes with plastic safety glass but toughened glass is a recommended option. There is a substantial door, which is 750 mm wide and fitted with security hinges and a 3 lever mortice door lock. The security on this Ace Sheds building is excellent and to break into the building requires some excellent tools to be used and the sensible burglar is not going to be caught with those. Even with the right tools the Reigate Security Shed is going to resist the burglar totally or cause the person to take a long time in the operation, which will deter all but the hardened criminal.

Ace Sheds have not just made this shed to be a safe but primarily as an excellent garden storage area and the Reigate Security Shed has a good storage area. The Sheds can be sourced in sizes from 8 foot x 6 foot to a large 14 foot x 8 foot which will cover most needs. This shed is ideal for keeping garden mowers and hedge trimmers as well as the children's cycles safely and securely. [Ace Sheds](#) also recommend using a burglar alarm in certain cases and a no window option is also available to reduce any chance of seeing inside the building.
