May 14, 2013, 7:32 am -- [/EPR NETWORK/](#) -- Laundry 365 is pleased to have formed a good relationship with the 5th largest domestic appliance manufacturer in Europe namely Fagor and sells a complete range of their products. However Laundry 365 has now moved into the complete dishwashing area as well as the laundry business. The company has vast experience in the clothes washing industry and its expertise in the use and servicing of all the laundry based machines, from [Commercial Laundry Equipment Parts](#) to full service packages. The similarity in the ware washing business machines to the laundry washers and other machines is such that laundry 365 has an excellent base with which to advise, supply and service any of the [warewashers](#) that are at the top of the game. They also have all the links to the suppliers and also to the user trade as they are very often the same as those that require laundries and washing services.

The Fagor AD20C Glass Washer is a great machine for a good standard operation that requires a steady supply of clean glasses ready for instant return to service. Fagor is based in the Basque country and is a company that has steadily grown over the years and provides excellent quality machines for the catering trade. It regularly competes quite successfully with all the major domestic appliance companies at a competitive price and with a high quality product. The Fagor AD20C Glass Washer will wash some 320 glasses per hour and uses a microprocessor control to operate the unit in 3 major programmes working from a remove all problems programme for heavily soiled glasses to a quick programme for typical low level contamination. The quality of the cleaning is excellent and the glasses will come out dry and clean and ready to use.

Laundry 365 notes that the Fagor AD20C Glass Washer is ideal for the standard kitchen, bar or hostelry as it provides a large quantity of glasses from a relatively small machine. The unit fits under the standard work counter so that it is out of the way and yet is easily accessible and being fitted at low level it leaves the upper area open for work space or open counter usage. There is an automatic detergent dispenser which will provide the right quantity of detergent on a consistent basis.

It is noted that [Laundry 365](#) are pleased with the versatility of the Fagor AD20C Glass Washer as it will operate successfully in the full range of catering industries. It works ideally in the bar or pub trade where the unit will sit quite safely under the bar counter to provide a good quick access to recycled glasses on a regular basis. It can be loaded by bar staff in between serving and fits with the continual usage and recycling system that this usage requires. On the other hand it will also fit quite happily in the restaurant or large kitchen where glasses are returned from the eating area sorted from the crockery and washed ready for return service. This is a good workhorse supplied by a great supplier in Laundry 365.
