Kent, United Kingdom, October 03, 2013, 11:41 am -- /[EPR NETWORK](#)/ -- Rising fuel costs and the higher costs of running a transport business in the current economic climate present a challenge to even to the largest companies.

Over the last 5 years fuel prices and running costs have spiraled out of control and the economic downturn has meant there are less business opportunities around.

Some firms are starting to explore import and export possibilities from the UK but high ferry costs would seriously eat into the already squeezed profit margins.

ChannelPorts are customs clearance specialists dealing with all types of customs documents for goods going in and out of the UK.

Spotting a need in the market for discounted Freight ferry tickets they were able to negotiate a deal with leading ferry companies from all of the major UK ports.

The website [i-ferry](#) has been created to provide a one stop shop for hauliers and carriers looking for the best prices on Freight ferry tickets.

They have received many appreciative comments from their clients as they continue to expand the range of services they offer to hauliers, HGV drivers, commercial fleet managers and the general public.

To contact ChannelPorts, please use chris.childs@channelports.co.uk, or telephone 01304 218328.
