October 25, 2013, 9:05 am -- /[EPR NETWORK](#)/ -- Online casinos have filled the gap where land based casinos could not deliver, but now mobile casinos are taking over from online casinos offering players the chance to gamble on the go at any time from almost anywhere.

Times are changing and the internet has provided an entire online world where life has been simplified and everything can be found at the click of a button. There is almost no need for a person to leave their house now, with online shopping, online banking and any information needed at the tip of a person's fingers. The same goes for online gambling, players no longer need to leave the comfort of their own home to enjoy a wide variety of top class casino games. But casinos have thought ahead and in case of that moment when players do leave their house they can take the casino with them in the form of a mobile casino app on their smartphone or tablet.

Players are able to find the same excitement and entertainment from mobile casino as they do online casinos and even land based casinos. Often players will migrate from an online casino to its own brand mobile casino as many online casinos do offer a mobile counterpart.

Players that are new to the casino will be able to claim a new player welcome bonus if they sign up online or via the mobile app, these mobile casino bonuses are also competitive and enticing. Royal Vegas mobile casino for instance offers players a \$1,200 FREE welcome bonus split across three deposits, this is something a land based casino would never offer.

The games on offer are the same: table games, slot games and others, although online casinos seem to offer the most variety with some brands having over 500 casino games on offer. The ease of playing these games at home means people no longer have to get into

their cars, drive to the casino and sit in a room full of strangers and smoke whilst mind numbingly spinning the reels. They can actually do other things while they play by setting the slot game to auto spin players can get chores done, watch their favorite television shows or even take a shower to hopefully return having won a huge jackpot. Then why would players use the mobile version if playing online is the way to go, how about when standing in a queue at the store, on a long train journey or waiting for the dentist these are some of the examples listed by players that enjoy this on the go style gaming.

The mobile casino is not a new concept and has been available to players for a few years, but what is new is that more and more people are now using this method for casino playing. Even people that are not huge casino enthusiasts are playing the occasional game of mobile poker or roulette. A prime example from not so long ago is Sen. John McCain who was caught playing some mobile poker during a senate hearing, this just shows there is always time for a quick bet and the mobile casino has made it even easier.

Players interested in this 'new' version of gambling can sign up at their usual online casinos mobile version or even download an app from iTunes or GooglePlay. What is nice about getting the casino from an app store is that players are able to read reviews and learn from others experiences. For players that are interested in learning more about this on the go gaming they can visit www.royal-vegas.com and click on the mobile page.
