Industry: [Education](#), [Consumer Services](#)

December 11, 2013, 11:33 am -- /[EPR NETWORK](#)/ --  
PlagiarismExamine launches its plagiarism checking service. The company has combined the best features of all the checkers available online and turned them into a brand-new detecting system.

Company officials expect the product to be of a great help to those in need of plagiarism detection. The checker's audience includes, but is not limited to: students, teachers, content writers, bloggers, webmasters, journalists, copywriters, internet marketing companies, education establishments and lawyers dealing with copyright protection.

## **About PlagiarismExamine**

The service was created by the team of dedicated young IT professionals with their own vision on how should plagiarism be detected. It took a lot of time to analyze all the algorithms present on the web to develop a fresh one that could beat the quality provided by competitors. At this moment there are only two checkers able to compete with PlagiarismExamine. However, they are not able to offer even a half of features PlagiarismExamine users get:

- 1) Plagiarism check depth. You can decide how deep should we dig. The only thing to keep in mind is that Premium quality is logically a bit more expensive than Standard.
- 2) Turbo speed of check. When saying «turbo» we mean turbo. An average plagiarism scan takes 10-15 seconds.
- 3) Plagiarism reporting system. You get results in a convenient form of a report, with all the matches featured and given as hyperlinks. On the left you are able to see all the links to the sources, or you can click on the featured part right in text and be redirected to the source from there. Not to mention the ability to receive reports right to your email address.
- 4) Full privacy. We do not store texts being submitted. You are the only person who can review reports. Please beware of the services that save your texts, as they might use it for their own profit by publishing them online.
- 5) Try before you buy. Do not pay to the services that ask you to pay before actually using the system. We give you an opportunity to try the service first, without any limitations in features.
- 6) Affordable pricing. Prices start at 10 cents.
- 7) Loyalty program. Up to 20% bonuses and discounts.

### **Why is PlagiarismExamine not free?**

This is the most common question the company receives. Please read the answer given by one of the company's officials:

«We would love to make plagiarism checking process free, but that is impossible due to the following reasons: 1) the company has to pay salaries to all the employees who keep the service up and running. This includes support desk, webdevs, IT crowd etc; 2) administrative costs on hosting, servers and office itself; 3) the company cooperates with the most popular search engines — Google, Bing and Yahoo — that charge for every check that is made by the customer. Sorry, but we cannot make it free.»

### **How it all works?**

The plagiarism checking process at PlagiarismExamine is super simple. Just follow these steps:

Upload your text (from file or by pasting)  
Confirm that you would like to start a check (the system calculates the number of words and the price automatically)  
Get results (review report and see if you have any troubles with authenticity)

Find more information on the company's website - [plagiarismexamine.com](http://plagiarismexamine.com). Happy checking!
