

# **Virtual Pediatrics, "Immediate Medical Care, Virtually Anywhere" -- Online Pediatric Healthcare Consults for Your Sick or Injured Child -- To Launch This Month**

Released on: May 08, 2014, 4:07 pm (EDT)

Author: **Kyon A. Hood, MD, FAAP**

Industry: Healthcare

Spotsylvania, VA, May 08, 2014 -- /[EPR NETWORK](#)/ -- Virtual Pediatrics ([www.virtualpediatrics.com](http://www.virtualpediatrics.com)), a national pediatric telemedicine service dedicated specifically to children, provides immediate medical care to those sick or injured, without them having to leave the comfort of their home. Certified family and pediatric health care providers, through online webcam consultation, provide personalized treatment plans, including e-prescriptions if needed. Virtual Pediatrics is set to launch in 10 states (AZ, CA, FL, GA, IL, NJ, NY, NC, TX & VA) this month.

**Virtual Pediatrics Providers**

Virtual Pediatrics dedicated and compassionate providers, who are board certified, licensed and credentialed to practice in their respective state, remain on standby for consultation from the hours of 8am to 12am, seven days a week.

### **Why Wait?**

Children no longer need to wait a day or two to see their family doctor, nor will they have to wait in a crowded office or ER waiting room with other sick patients for minor ailments. By receiving an immediate telemedicine consultation and treatment, kids won't miss additional days of school, parents won't have to call out from work and worry about additional lost wages, and most importantly, sick or injured children can start getting better sooner.

### **Save Money**

The cost of a Virtual Pediatrics consultation is less than many walk-in clinic fees and insurance co-pays, especially those expensive ER copays parents often pay after hours, when their doctor's office is closed.

### **What and Where Do Virtual Pediatrics Providers Treat?**

Virtual Pediatrics can treat your child anywhere - home, daycare, or on vacation. This month, Virtual Pediatrics will launch in 10 states (Arizona, California, Florida, Georgia, Illinois, New Jersey, New York, North Carolina, Texas and Virginia). Each month, additional states will be added until Virtual Pediatrics providers are able to care for children in all 50 states. Illnesses or ailments that can be treated through online consultations include, but are not limited to:

Abrasions, Allergies, Bites & Stings, Body Aches, Bronchitis, Bruises, Burns, Colic, Cough, Croup, Dehydration, Diarrhea, Ear Ache, Fever, Flu, Hand-Foot-Mouth Disease, Headaches, Hives, Itchy Eyes, Lice, Medication Refills, Minor Head Injuries, Nasal Congestion, Nausea, Pink Eye, Rashes, Reflux, Respiratory Infections, Seasonal Allergies, Sinus Infections, Skin Infections, Sore Throat, Sprains & Strains, Travel Medications, Urinary Tract Infections (Only for Older Kids), Vomiting

### **How Does It Work?**

Parents can go to [www.virtualpediatrics.com](http://www.virtualpediatrics.com) and click "start visit", after which they will be directed to the registration page of our partner

company, MeMD. Once the secure patient account is created, parents complete a brief medical history form for their child and submit payment, at which point they are directed to a patient care coordinator who will arrange the consultation between patient and healthcare provider. Upon completion of the webcam consultation, a Virtual Pediatrics provider will provide an individual treatment plan for the child's ailment and, if needed, e-prescribe any medication to a local pharmacy that the family selected during the registration process. After the visit is concluded, parents can login to the patient account and print their child's medical record as well as discharge instructions for their specific condition.

### **Leading Edge of Pediatric Healthcare**

Virtual Pediatrics is working toward becoming the national leader in pediatric telemedicine, while providing excellent medical care to children and families in need. In this era of social media and advanced video technology, the practice of medicine is constantly evolving, and Virtual Pediatrics is at the frontier of this rapidly developing area of pediatric healthcare.
