Industry: [Healthcare](#)

PERTH, Australia, August 02, 2014 -- /[EPR NETWORK](#)/ -- Usually, a new medical website launch is not news worthy. They come in a dozen every month. But Body Shaping Perth is making the difference this month. By far.

[Bodyshapingperth.com.au](#) is not just another medical website, coming out of nowhere. It is a new website dedicated in cosmetic surgery and it is the brain child of Dr. Jayson Oates and his team at Academy Facial Plastics. In case you are not familiar with one of the best cosmetic surgery clinics in Western Australia, Dr. Oates and his team of trained medical professionals are responsible for a huge number of successful cosmetic surgeries in Western Australia (Perth).

This same team now brings you **bodyshapingperth.com.au** which offers up to date information about a number of intimate surgical procedures: [labiaplasty](#), labia minora - labia majora augmentation, penis enlargement, [vaginal rejuvenation](#), G-spot augmentation, liposuction and coolsculpting®.

Intimate cosmetic surgery is not a fad or something that people do only for aesthetic reasons. There are a number of people who need intimate cosmetic surgery for medical reasons. Body Shaping Perth offers solutions and suggestions for both these groups of patients.

What is new about this website is that not only it is full of related information and answers to questions that maybe some people would be afraid to ask, but it also offers a free medical consultation with one of the medical professionals in the clinic! You only need to book your appointment! How many medical sites offer such a service?

During the consultation you can ask any kind of related questions and have a full set of answers focused on your specific needs. Probably these needs will have to do with intimate cosmetic surgery. But if you have questions in general regarding cosmetic surgery, the way your body looks, the way that you see yourself, the way that your face is

shaped, the medical professionals of [bodyshapingperth.com.au](http://bodyshapingperth.com.au) will be again more than happy to answer you. For example did you know that many aesthetic procedures are non-evasive and that the recovery period varies from hours to days, depending on the procedure?

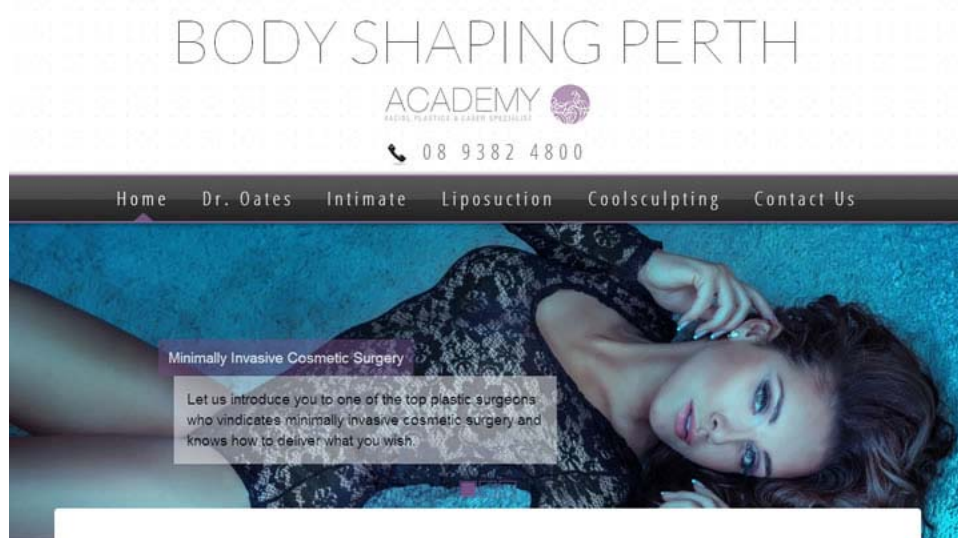

Even if you are not so keen on visiting the state of the art clinic of Body Shaping Perth(located in Subiaco, WA) you can navigate through its pages and still find the answers that you seek regarding intimate cosmetic surgery whether you are a man or a woman.
