Burgas, Bulgaria, February 27, 2015 -- /EPR NETWORK/ -- A small team of developers announced the launch of the project at crowdfunding platform IndieGoGo to raise funds for the completion of the online adventure shooter game.

Game conception

Several players with a minimal equipment landed in different parts of the small island and they should find the hidden treasure (it is planned to give real prizes for winners).

Navigation on the hexagonal field, but first-person view, something will remind the game Myst but with possibility of shooting animals and each other.

The forests are full of wild animals, it is necessary to hunt them and exchange trophies to food and ammo.

Player can attack his opponents to prevent them from reaching the goal.

It is not known in advance where is the desired prize, but the execution of various tasks of local residents and attentive search for hidden objects will help player to find a clue.

The game will be free, but with the ability to purchase of various equipment.

Platform

HTML5 browser online game with mobile platform support (Android, IOS).
