

# FlipHTML5 Highly Recommends Flip Book Maker to Governments Going Digital

Released on: March 30, 2015, 3:47 pm (EDT)

Author: **FlipHTML5 Software Co., Ltd.**

Industry: [Software](#), [Government](#), [Internet & Online](#)

Hong Kong, March 30, 2015 -- /[EPR NETWORK](#)/ -- FlipHTML5 has recently taken the initiative to show governments how beneficial flip book maker software can be to streamline their public announcements, content creation efforts, documents, and delivery methods in their daily operations. Citizens want excellent services in all localities, and digitalization guarantees that citizen services will be greatly enhanced in the "information era" that the world is currently in. As more and more governments make the move to go digital, they will need strong solutions to make their content delivery approaches efficient and secure. FlipHTML5 not only helps digitalized governments to create great content, it helps them too effectively and securely deliver the content across many channels simultaneously as well. Security is a high priority to every government since so many regulations are in place, so FlipHTML5 is the perfect cost-effective solution for governments on local, state, and national levels.

The benefits of governments using FlipHTML5 are numerous. They will be able to convert their announcements, reports, and other important documents into stunning HTML5 flipbooks with ease. Users will have the ability to convert PDF documents, Word documents, and other document types to jQuery and HTML5 flipbooks that are engaging and easy to read. The software supports up to 17 languages, and it gives governments the ability to make the experience highly interactive for viewers. FlipHTML5 has tons of high quality templates that can be customized in every way. From backgrounds and navigation options, to buttons, logos, color schemes, and more, users will have plenty of choices to make attractive flipbooks that will more than meet their needs. Other amazing features include but are not limited to media rich editing options, the ability to make flipbooks shoppable,

annotation and note taking capabilities, photo and video slideshows, and advanced event editing. Going digital by using FlipHTML5 will be a sweeping transformation for governments, but the move will be well worth it since citizens will appreciate the effort to have their services enhanced.
