Press Release Summary = **Timberline Press** is pleased to announce the publication of "**Operation Supergoose**," a satirical novel lampooning the so-called War on Terror. The story follows the adventures of superhero Lieutenant Candide, assigned to avenge 9/11. He tries to obey, but instead uncovers dark war agendas, pitting him against his civilian superiors: President Buzz Twofer and VP Chain Dickey. Author **William Hart** researched current US wars carefully in order to get to the bottom of things.

Press Release Body = Near the conclusion of "**Operation Supergoose**," a humorous novel just published by **Timberline Press**, the President is clearing brush on his ranch near Crawdad, Texas when he falls down a hole into a nest of copperheads! The nation is stunned, but his inner circle celebrates as cutting-edge surgery saves the part of the Commander-in-Chief they need: his smirking, lying head.

Just a sample of the humor found throughout this provocative novel, written not for everyone, as author **William Hart** admits: "My depiction of recent history will bother some, but so be it. I speak to those who regard our War on Terror as a disastrous hoax--and to

those willing to face some tough choices." The story follows the adventures of superhero Lieutenant Ernest Candide, sent to avenge 9/11. Trying hard to obey orders, he stumbles upon dark war agendas and reluctantly turns against his handlers, all the way up the chain of command to President Buzz Twofer and VP Chain Dickey.

Hart, who trained in political science & international relations, spent two years researching our current wars. He ferreted out a host of dirty war secrets that will surprise most Americans much as they did Candide, encouraging a redefinition and renewal of their love for country.
