Press Release Body: **Dr. Stephen Sulzbach, DMD of Aesthetic Dentistry of South Riding** has recently opened his newest office serving the city of South Riding Virginia – a section of Loudoun County. He is pleased to offer his patients the **Invisalign treatment** method as means to straightening their teeth and attaining that beautiful smile they desire.

Dr. Sulzbach is a general dentist providing aesthetic and reconstructive dentistry and has extensive training and experience in cosmetic dentistry and smile makeover or reconstruction. **He is a member of the American Academy of Cosmetic Dentistry as well as the International Association of Comprehensive Aesthetics.**

Dr. Sulzbach is happy to offer all new patients that are interested in the Invisalign procedure a free consultation to go over the options that work best for them. During this consultation he is able to take the time to get to know the needs of the patients as well as determine if they are a match to the procedure. It is a good opportunity for patients to not only learn about Invisalign but cosmetic dentistry as a whole and the available options that they may best be suitable for them.

The **Invisalign® system** is the virtually invisible way to straighten your teeth and achieve the dazzling smile you've always dreamed of. Using advanced 3-D computer-imaging technology, Dr. Sulzbach develops your complete treatment plan, from the initial position of your teeth to the final desired position. Then a series of clear aligners are custom-made for your teeth – and your teeth only – to move them little by little. Each aligner is worn for about two weeks before being replaced by the next in the series, until the final position of your teeth is achieved. Your Invisalign treatment time will be determined by your doctor, based on your specific needs.

Like brackets and arch wires are to braces, Invisalign aligners move teeth through the appropriate placement of controlled force on your teeth. The main difference is that Invisalign not only controls forces, but also the timing of the force application. During each stage, only certain teeth are allowed to move. These movements are determined by Dr. Sulzbach as he maps out your unique Invisalign treatment plan.

Invisalign aligners are practically clear. No one may even notice that you're wearing these virtually invisible "braces," making Invisalign a seamless fit with your lifestyle and day-to-day interactions with others.

Invisalign is removable. Unlike braces, you have the flexibility to eat and drink what you want during treatment by simply removing the aligners. And you can also remove the aligners to brush and floss as you normally would for fresh breath and good oral hygiene.

Unlike braces, there are no metal brackets or wires with the **Invisalign system** that could cause irritation to your mouth. Plus since your office visits during treatment don't involve metal or wire adjustments, you'll likely spend less time in the doctor's chair.

And finally, Invisalign allows you to view your virtual results and treatment plan before you start so you can see how your straight teeth will look when your treatment is complete.

If you would like to schedule a consultation with Dr. Sulzbach to see if Invisalign would be right for you, please visit us online at www.virginiainvisaligndentist.com or feel free to give us a call at (703) 659-0373.
