Industry: [Entertainment](#)

**Press Release Summary: WalkerPoker announced today that it has passed the \$200,000 bad beat jackpot and waiting for one lucky player to come and take this imaginary prize.**

Press Release Body: Bad beat in poker is when you have a good hand that is a favorite to win beaten by another hand. "Most of the time it is a hand that caught a miracle draw on the river that should not have been played to begin with. This is more common in low limit games because many players have the any two cards can win mentality". Said Robert, **WalkerPoker** professional advisor. "Many players will play any ace and a few players will play any suited cards regardless of the rank. Some players are calling stations that will enter the pot with marginal or terrible hands and then call all the way to the river in hopes making their draw. Occasionally they do make their hands and you suffer a bad beat."

Bad beats are a normal part of poker that a good player learns to accept. **WalkerPoker** team decided to turn the bad luck into good luck and is holding a bad beat jackpot "competition". If you happen to get a bad beat, which answers the requirements, you can win more than \$200,000.

**WalkerPoker.com** is one of the fastest growing poker rooms in the poker world. Walker is offering

games in all limits and around the clock tournaments with massive overlays. Walker Poker is a US friendly room.
