Press Release Summary:
The Creative Health Center proudly announces the launching of its new online website which allows patients to view detailed descriptions of available treatment options. It permits patients to become more informed and knowledgeable in their care along with being familiar with all available options.

As one of the largest Pain Management facilities in Pinellas County and the Tampa Bay area for nearly 25 years, the center continues to grow by adding several new specialty medical treatment options.

Press Release Body: As one of Clearwater's first Pain Management clinics nearly 25 years ago, **Dr Jayam Krishna-Iyer** open the doors to patients with chronic back & neck pain, spine injuries, arthritis and many other debilitating painful illnesses.

Since then, residents from Belleair, Largo, Seminole, Indian Rocks, Redington Beach, Palm Harbor, Safety Harbor, Pinellas Park, St. Petersburg & Clearwater Beach have sought out her pain management expertise. Where previous medical treatment had failed, leaving patients frustrated and with little options, this Board Certified Anesthesiologist could now offer much needed pain relief and hope. Competently treating a multitude of spine issues like bulging or herniated discs, degenerative disc disease, arthritis, migraine headaches, hip & knee joint pain.

For the more serious cases, surgery is not always a necessary treatment. Less invasive pain relieving injections can be given using the facility's fluoroscope for complete accuracy. Steroid epidural nerve blocks, Radio frequency, Stellate ganglion blocks, lumbar sympathetic blocks & trigger point injections can give lasting relief from spine, hip & leg pain.

As **The Creative Health Center** continues to meet the needs of its pain management patients, the website offers detailed descriptions of numerous other treatment options. One of the latest new injectable drugs called Euflexxa has been getting remarkable results in their orthopaedic patients being treated for a variety of hip & knee joint pain including osteoarthritis. Where past attempts had failed or surgery had been recommended, there is now a promising new option that gives instant relief in most candidates.

With the addition of health care staff, the center is excited about the ability to now treat patients with the latest in weight loss technology. Using several options for the treatment of cellulite and unwanted fat pockets along with the physicians diet plan, patients are able to lose weight in a safe and healthy

environment. Diet plans may include certain dietary supplements & vitamins along with continuous medical evaluations.

The facility is also offering cosmetic improvement treatments. With the use of Botox and lumpless Derma fillers injected directly into facial creases and muscles that cause severe frown lines and wrinkles, significant improvement is seen

after just a few short days. This non-surgical, affordable treatment of Botox can last up to 4 months. Derma filler treatments can last up to a full year.

The center now houses its own family practice with the recent addition of 2 General Practice Physicians. **Dr. Felicia Spuza and Dr. Michael Spuza** are now providing everyday basic health care to the public. With all of these specialty services, **The Creative Health Center** now has the ability to treat a wide range of diverse patients. Everything is done in the one location which flaunts its own fluoroscopy machine, sterile procedure & recovery rooms, along

with an educated competent medical staff that is keeping up with the constant changes and improvements in the medical field.

The website offers informative, detailed descriptions of available services, staff and office information. Now accepting new patients. Call for an appointment 727-443-4242
