

# **GOpay specialising in online credit card payment applications for business**

Released on: October 30, 2008, 5:52 am

Press Release Author: [WebStation Australia](#)

Industry: [Small Business](#)

**Press Release Summary: GOpay Pty Ltd is a specialist ecommerce application developer. Web focused applications have been developed Australia wide for government and businesses since 2000 to take advantage of the growing number of ecommerce opportunities involving credit card payments.**

Press Release Body: **GOpay** is part of the **WebStation Australia Pty Ltd** group whose team in conjunction with Microsoft pioneered internet commerce before the first browsers in 1993. The group includes **GObookingsSystems Pty Ltd** who in 2000 developed Australia's leading enterprise appointment management system -**GObookings**

## **AppointmentDiary V8.**

**GOpay** can provide the online credit card payment gateway 'connection' between your web site or business and your bank account. **GOpay** is specially licensed to facilitate the transfer of funds from your customer direct into your bank account. If required applications can be developed as a solution to meet that special need. In addition **GOpay** can provide you with a raft of off-the-shelf ecommerce tools to take advantage of the opportunities ecommerce has to offer. We suggest you ask a **GOpay** consultant where you can use GOpay to best advantage for your business. [www.gopay.com.au](http://www.gopay.com.au)

There are essentially two categories of ecommerce tools provided by the WebStation group, and both are supplied by **GOpay** and its sister company **GObookings**. **GObookings Systems** provide Enterprise level appointment and booking systems for a satisfied client base within Australia and the USA.

**GObookings Version 8** clients include a mix of Federal and State Government departments, universities, health care services, global corporations, medium to large and small businesses... all successfully using the scheduling booking systems as an integral part of their operations.

Unique configuration flexibility along with a well proven product distinguishes **GObookings** from competitors.

In addition there are off-the-shelf customizable options with easy to use interfaces and advanced feature and business rule options available to satisfy any size business or government department. If preferred the **GObookings** engine can also be top and tailed as middleware. See [www.gobookings.com.au](http://www.gobookings.com.au).
