Barack Obama, President of the United States of America proclaims March 1 through March 7, 2009, as Save Your Vision Week. BiCOM Inc home of Glaucoma Eye Test Diaton – non-contact [Glaucoma Eye Test](#) through the Eyelid is prepared to assist with vision screenings. Roman Iospa, CEO of BiCOM comments on Presidents support of glaucoma screenings. Early diagnosis and timely treatment are critical to minimize vision loss from eye diseases.

Proclamation by the president of the United States of America addresses the important issue of Blindness and visual impairment that affects millions of Americans. Early diagnosis and timely treatment are critical to minimize vision loss from eye diseases. During Save Your Vision Week – Barack Obama encourages all Americans to take action to prevent their vision loss.

BiCOM Inc. home of Glaucoma Eye Test Diaton [Tonometer](#) (IOP through the Eyelid), has been a long supporter of preventive glaucoma screenings. At a recent free glaucoma screening event where BiCOM in conjunction with SAVE Program (Sight for a Vision Exchange) and [The Congressional Glaucoma Caucus Foundation](#) conducted at [New York City Children's Services](#) in honor of African American Heritage Celebration has revealed many with elevated intraocular pressure (IOP) a major risk factor for glaucoma. Patients were referred to an ophthalmologist Dr. Lynnette P. Williams-Young a glaucoma specialist for further evaluation.

Unfortunately, most people have limited knowledge of blinding eye disorders. Based on [National Eye Institute](#) 2005 study, only eight percent of respondents knew that glaucoma, a condition that can damage the optic nerve and cause vision loss and blindness, strikes without early warning. Similarly, glaucoma also begins as a silent vision threat; as per Prevent Blindness America, it is estimated that of those Americans that have glaucoma, only half know they have it. It is estimated that 60 million Americans are at risk for developing glaucoma.

Everyone should be screened, especially with availability of new non-invasive (over the eyelid) glaucoma screening technology aka "[Glaucoma Eye Test](#)" [Diaton tonometer](#) available to optometrists, ophthalmologists and general physicians, enabling doctors to quickly and painlessly screen individuals at risk.

Several demographic groups are at higher risk for visual impairment, including teenagers, diabetics, Hispanics, African Americans, and the economically disadvantaged. Older Americans are more susceptible to eye conditions such as age-related macular degeneration, diabetic retinopathy, and glaucoma. Children need regular vision screenings because vision disorders left untreated during childhood can lead to permanent visual impairment during adulthood.

President Obama stated, "Eye disease knows no bounds, and every American should take steps to protect his or her eyesight."

To remind Americans about the importance of safeguarding their eyesight, the Congress, by joint resolution approved December 30, 1963, as amended (77 Stat. 629; 36 U.S.C. 138), has authorized and requested the President to proclaim the first week in March of each year as "Save Your Vision Week."

"I'm pleased to see that President Barack Obama, with only weeks in the office is addressing an important issue of blindness, its early detection and timely treatment. My whole team at BiCOM Inc., and our partners are ready to continue our efforts and act on a larger scale by reaching out to many more people through awareness, training, glaucoma screening events and making "Glaucoma Eye Test" Diaton tonometer available to all that are willing to participate," said Roman Iospa, CEO of BiCOM Inc.

From the website of the White House: http://www.whitehouse.gov/the_press_office/Save-Your-Vision-Week-2009/

"NOW, THEREFORE, I, BARACK OBAMA, President of the United States of America, do hereby proclaim March 1 through March 7, 2009, as Save Your Vision Week. During this time, I invite eye care professionals, teachers, members of the media, and all organizations dedicated to preserving eyesight to join in activities that will raise awareness of vision diseases and disorders."
