Industry: [Internet & Online](#)

*BestTV, a global provider of internet TV platform technologies and video streaming systems, has provided the integral video streaming software for modern entertainment entity, AMOS.*

LONDON, UK- BestTV has partnered with AMOS (A Matter of Substance) to provide a premium Video-On-Demand (VOD) service on an internet TV platform.

AMOS is a contemporary entertainment company producing visual media across the music, film and television industries. AMOS solely uses premium 1080i HD footage from around the globe to create a first-class viewing experience.

The site broadcasts its media assets in HD format with the option to switch to lower bandwidth if the user is on a slower internet connection.

Utilising V-Ware™ (Best TV's superior internet video platform) AMOS' web team has connected the V-ware™ search engine to the video catalogue so all videos are indexed and can be easily searched via the built in search engine facility.

The AMOS webmaster can upload videos to the V-ware™ platform via an intuitive and easy-to-use Video Management System (VMS). The technology utilises Adobe Flash Player 10 for optimal video streaming of High Definition video content.

Additionally BestTV has provided AMOS with a total Content Delivery Network (CDN) solution so videos can stream optimally to global viewers.

View beautiful contemporary arts videos in high definition and learn more now at <http://www.amostv.com/online/>.
