EnergieVair (www.energievair.com) is one of the world's leader in the industrial sector of Renewable Energies. It is a compagny based in Canada that supply, install and make the promotion of Renewable Energies, all over the world. The new year 2010 seems very promissing for EnergieVair that can now count on new distributors in Europe and Africa. Also, they've just published, on the 1st of jan. 2010, their new website, all refreshed with new shopping kart options and many more interesting products. From now on, you can also read other buyer's review and feedback about the product you are about to purchase. Be sure to do it the right way!

EnergieVair now offers an even wider variety of vertical axis wind turbines (VAWT), from more than 4 design that will match your needs, even if you are in low-wind zones or urban locations. EnergieVair also offers horizontal axis wind turbines (HAWT), for gust-wind regions. Want to maximize your system's efficiency? We suggest hybrid installations using Solar Panels and Wind Turbines.

Maybe you are far away from Canada? Dont worry, EnergieVair ships worldwide and they'll find an affordable way for the goods to reach you. All of

their products (Solar Panels, Wind Turbines, Regulators, Inverters, Converters, etc.) are under warranty for long-term periode, to assure you a constant input of electricity, and a peace of mind.

If you are off the grid, without electricity, you will probably need an independant system, using batteries. If you are already connected to the grid, you would probably like to lower

your electric bills by connecting your Wind Turbine or Solar Panels directly to the grid, without batteries. This is the easiest and most affordable way to do it! No matter what system you need, EnergieVair will help you! Come and visit their new website and see by yourself the wide choice of good quality Renewable Energy products, at very low prices. If you are not sure yet, contact their friendly customer's service for an immediat consultation, assistance or advise. You will get a reply withing 48 hours.

The cost for traditional and polluting energy sources are rising. On the other hand, the cost for Renewable and green Energies are falling. It is now more possible than ever to live in respect with the environment and save some electric fees. Whatever you want to do, you can do it NOW! Wired in parallel with the public electricity (grid), as an independent electric system, as an emergency power supply, to electrify a camp, a boat or a RV, or even to heat a place, with EnergieVair, the possibilities are INFINITE!
