New Book Explores Lust, Demonic Curses, and a Convent's Fall from Grace

Released on: April 19, 2010, 4:10 am

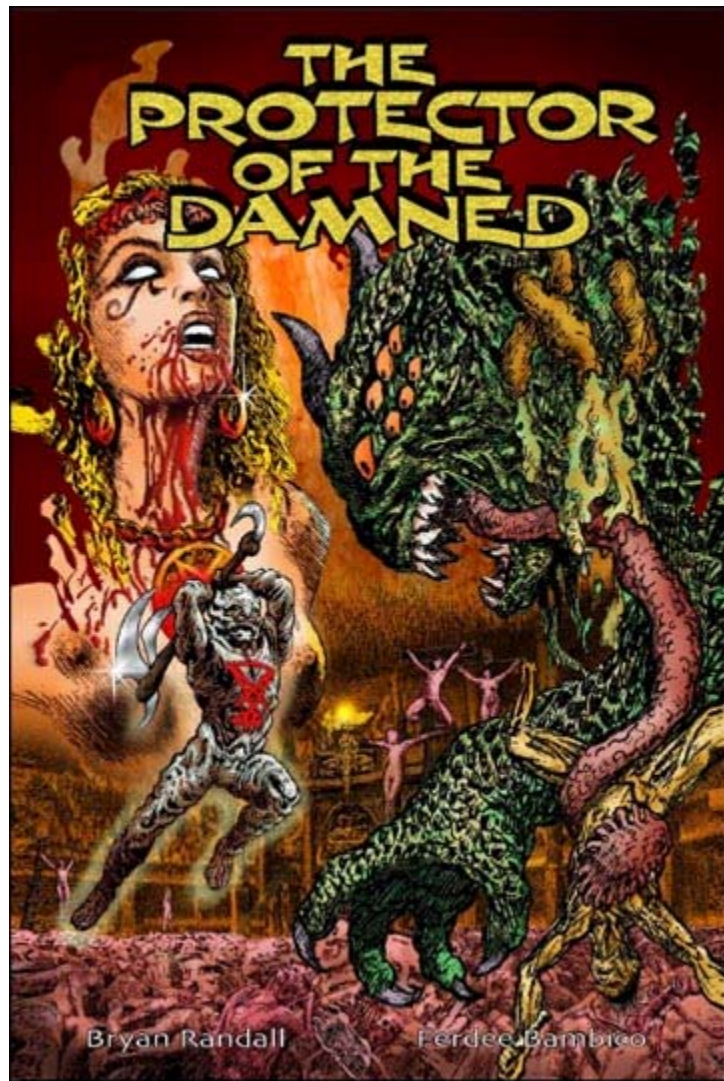

Author: Bryan Randall

Industry: [Entertainment](#)

Creators Bryan Randall and Ferdee Bambico have teamed up to bring readers a tale of lustful demonic curse upon an unsuspecting convent for their appointed protector. And its effects upon the convent are anything but holy in the nightmarish tale *The Protector of the Damned*, now available to read with the option to donate at www.resurrectandprotect.viviti.com.

In the novel, a bleak prophecy has been revealed to Lilith – “You will all be devoured! You’ve become sustenance in your master’s eyes!” These words come from Naxul – a fallen angel bound to chains of eternal darkness, but also a protector of his own kind.

A protector of the damned. Lilith and her coven put up arms against

their master, resurrecting the man who once protected them as their weapon of magic. Their fate lies in the outcome of this battle, for they are to pay homage to Naxul if their master is destroyed.

The Protector of the Damned is a story not only of a convent's fall from grace, but also of occult, mysticism, necrophilia, demon worship and conjuration. There is also a psychological element that ponders the notion that consciousness is an element of the soul. Is consciousness a manifestation of the human spirit? And without it, would we be dead? The Protector of the Damned is a tale that plunges the reader directly into a world of utter darkness – a world in which only the damned can flourish.

The book is also available as a soft cover at Lulu as well as a download for those who prefer a digital reading experience.

The Protector of the Damned marks Bryan Randall's debut in the published realm, with more great stories to follow in the future. Ferdee Bambico's work has previously been published exclusively in the Philippines, with The Protector of the Damned marking his US publishing debut.
