Industry: [Retail](#)

HSS Hire, the UK's award winning and leading tool and equipment hire company has announced new features to its successful tool management system, HSS LiveHire, which will give users "absolute control" like never before.

The recently launched HSS Livehire is a free online hire management system which gives larger clients firm control and complete transparency of tool and equipment hire contracts. Unique to the tool hire industry, free to use, and with 24 hour customer support, HSS LiveHire has been described as the most powerful tool the hire industry has ever offered.

The ease-of-use and customisable nature of HSS LiveHire provides a personalised and tailored management system, with a live dashboard which keeps users up to speed with live contracts, outstanding invoices, as well as any items which may need to be offhired on a given day.

HSS LiveHire allows for separate user accounts to be installed, with differing levels of access if required. All products include an image and a comprehensive product specification, as well as a downloadable operation and safety guide.

Fiona Perrin, Key Account Director at HSS, explains: "The level of detail HSS LiveHire enables clients to access and manage is remarkable. Our aim was to put the control and management into the

hands of our clients, and we believe this innovative system does just that.”

New features which have recently been introduced include electronic proof of delivery and collection, in addition to an electronic expected time of arrival for each hire. The latter is the latest part of hire information which can be accessed and viewed in ‘real-time’ in the ‘my hires’ tool.

Perrin adds: “We believe having access to a wealth of ‘real-time’ information regarding hires creates greater efficiency and control which, in turn, combine to ensure projects are completed on time and on budget.”

The clever yet uncomplicated tool is easy to navigate, intuitive to use and effective at helping clients get what is needed, when it is needed both on and offhire.

HSS LiveHire is the latest pioneering hire service run by HSS Hire. HSS Onsite, HSS Assured and HSS Pitstop are all services run by the award-winning tool and equipment hire specialists.

HSS Hire also have over 250 stores and supercentres located around the UK and Ireland, stocking over 15,000 items for hire, such as [Lawn aerator](#), carpet cleaners and chainsaws.

For more information on HSS Hire’s services available, visit <http://www.hss-live-hire.com> or <http://www.hss.com>.
