There's nothing quite so comforting and relaxing as luxuriating in a real down sleeping bag and Webtogs understand when Mother Nature knows best. Summer or Winter down offers the smallest, lightest and most comfortable option for a good night's sleep, and the Webtogs new range puts performance first. Featuring some of the world's leading brand names these are no ordinary [sleeping bags](#), these are sleeping bags offering the finest materials gathered from around the world and designed for the ultimate in night time comfort whatever the conditions outside.

Mountain Equipment built a name and a business around the quality of their down sleeping bags, with traditional ranges like the Dreamcatcher leading sales figures year after year. Featuring an 85/15 mix of 625+ Fill Power down the Dreamcatcher 450 keeps the features of a high end bag whilst keeping the cost down and making a down bag for Summer an affordable option. At the opposite end of the temperature scale the Iceline offers decades of proven performance in the planet's harshest climates. Using 750+ Fill Power down the Iceline oozes luxury, with its figure hugging design and super-soft lining complemented by an extreme rating that's justly deserved.

For the ultralight enthusiast, or adventure racer, the Yeti Passion is a revolution with the luxury of 900 Fill Power down in a wind and water resistant shell weighing in at a miserly 320gm. Using only the finest Polish goose down the Yeti bags make no compromises, and are rated amongst the world's lightest sleeping bags for their temperature ratings.

Western Mountaineering are specialists in high performance down sleeping bags and the Webtogs range draws extensively from their collection of top end designs. Using the finest materials these are bags that won't appear in the average high street but will show their qualities where it counts with night after night after uninterrupted sleep. From the SummerLite summer bag to the ultra-extreme Lynx GWS Western Mountaineering have used only the finest components without compromise and the results are astounding. At only 1420gm the Western Mountaineering Lynx MF leaves nothing to chance with a system of continuous baffles amongst the features that give a real world comfort rating of -23 degrees.

The name Rab is synonymous with high quality down, and the Webtogs range wouldn't be complete without the best this renowned British company can offer. The Rab Expedition 1000 Down Sleeping bag is part of the new range of down sleeping bags from Rab designed to take on the most extreme conditions. Ideal for high altitude and winter mountaineering this is a specialist bag for the sleep connoisseur, where a good night is essential for next-day performance. For the slightly less ambitious, but still seeking the same no-nonsense quality, the new style Andes comes in Men's and Women's versions or there's the Neutrino and Ascent ranges for more British conditions.

With classic brands like Marmot, Mountain Equipment and Rab and the best of a new wave like Crux, Yeti and Western Mountaineering there's no better place to look for your next sleeping bag than Webtogs, where only the best is good enough.
