

# The Latest Web-Application for Dating and Social Networking for Smartphones Hit the Market with the Global Launch of Date or Hate by Rcoms

Released on: September 24, 2010, 6:21 am

Author: [r-Coms](#)

Industry: [Entertainment](#)

R-Coms announces the global launch of the Date Or Hate [web-application for Smartphones](#) (iPhone & Android). Date or Hate is the next generation dating & social networking service based on users' geo-location. For the first time ever, people can be automatically matched based on their location whether they are in front of a computer or using Date or Hate mobile applications.

The extremely low latency, innovative combinations of several technologies and highly accurate matching algorithms enable automatic and valuable interactions between members. This first Date or Hate public web-app release for Iphone and Android will be gradually updated and upgraded with new features week in and week out. People can get it by typing: [m.mydateorhate.com](#) from their Iphones or

Androids, or by signing-up at [mydateorhate.com](http://mydateorhate.com)

During fall of 2010 and spring 2011 r-Coms will be gradually launching the [Date or Hate](#) native applications for Iphone, Ipad, Android, Blackberry and social media applications (Facebook, Myspace etc...)

"Date or Hate is the first of many applications that r-Coms has in the pipeline. We are focusing on location based solutions for both Business to Consumer markets and for Business to Business sectors" says Moulay Ghali Belghali, Co-founder and COO of the Swedish based r-Coms AB.

The technical development of the Date or Hate products is done in Nepal with an experienced technical team. The web-design and app-design is done both in Sweden and in Morocco.
