Industry: [Consumer Services](#)

For a limited time, you can get a \$10 discount just by mentioning this press release when you book your appointment.

When you first find out that you are pregnant, there are many things that will go through your mind. As your pregnancy continues and your unborn baby grows more and more, you will want to have the optimal bonding experiences with them.

This is especially something that the fathers are interested in. While the mothers can bond naturally by feeling the baby grow and kick in their wombs, fathers have this incredible chance to get a sneak peak at their baby before he or she is born.

Adorable Baby 3D/4D Ultrasound is the best place in Western California for you to get the best experience. Many people travel miles for the experience.

We are located at 411 Sycamore Valley Road West in Danville, California. We have different specials each month that will meet your needs. One of the best perks you will get by choosing us as your 3D/4D [ultrasound provider](#) is the fact that we offer a different approach to your typical hospital or doctor's office setting. Our offices are private and comfortable, which is not

something that you will usually get from your obstetricians office. Do you want more people to partake in your visit?

We have just the solution- our viewing room allows you to have up to five extra people to let in on your ultrasound.

Whether you want just a simple viewing to determine the gender of your baby, or you want to have ongoing visits to see your baby at different intervals of your pregnancy, we have just the package for you! Our packages start out at \$75 and are very affordable no matter what your budget. You can even have your entire session set to a DVD so that you can cherish it for years to come. Your baby will look back on these videos in awe of the technology of being able to see footage before they were even born.

If you have any questions about what we offer, or our facilities, do not hesitate to contact our offices and consult with one of our professionals. One of the most common questions that we get from soon to be parents is if the procedure is safe. We can assure you that we follow strict guidelines and will offer you the safest 3D/4D ultrasound around.

Adorable Baby [3D/4D Ultrasound](#) has been dedicated to serving parents-to-be for quite some time and would love to help you make incredible memories of your little one. Just remember, mention this press release to get \$10 off of the price of your package. There has never been a better time.

Do not let your pregnancy pass by without capturing it in 3D/4D images.
