Industry: Construction

It is believe that Calacatta Gold marble mosaics tiles polished and honed have always been the choice of kings in the ancient world for it strength and beauty. However the cost of this product and limited availability has put it out of reach and budget for most homeowners until now. The Builder Depot has launched a new collection of Calacatta Gold marble subway tiles, floor tiles, mosaics and trims for 2011 creating affordability and availability for homeowners, contractors and developers of a much sought after Calacatta gold product.

In the same tradition of all Builder Depot collections the pricing is very aggressive. "This particular product and European quarry has been monopolized by a few distributors" comments a Builder Depot spokesperson "This has allowed the pricing of the product to be inflated, we are going to sell the same quality for 75% less than the competitors"

The main products on the Calacatta Gold collection are:

•Calacatta Gold 3x6" Subway Tile Honed
•Calacatta Gold 2" Hexagon Tile Honed
•Calacatta Gold Herringbone Tile Honed
