## **Brighton, November**

**2010** – Christmas will be here soon, and many people are starting to wonder what they can buy for those friends and family they have yet to get gifts for. There are always fall-back options, such as DVDs or books, but many people want to get something more exciting. There are many things to consider too, such as cost, Christmas

lists and future needs. If you want to get something different, that the people you're giving to will appreciate forever, then think about getting them an experience gift. These are activity, which will allow people to fulfil long-held dreams or try something new, whether that's a family day out or a day of adrenaline.

The company has put together a list of the best Christmas gift buys on their website. This list includes activities that will match everyone's needs and interests. For families, the archery day is a great gift, allowing 2 adults and 2 children to take part in a fun day and learn

some target-shooting skills with a traditional bow and arrow. There are 4x4 driving days on offer for under-17s, who will not only get to have some valuable driving practice, but will also learn some fun off-road tricks and skills. There are many gifts aimed at couples or two friends. You could try the fun sport of zorbing, being harnessed into a ball together and rolled down a hill. Or perhaps a husky drawn sledge ride through the fields. Or go romantic, and head for the skies on a champagne-sunrise balloon flight.

**About Extreme Element:**

Extreme Element's Christmas gift experiences are available on their website in the form of vouchers. If you need [\*\*Christmas gift ideas\*\*](#), just log on and browse through the many options for some inspiration. You could book anything from a [\*\*tandem skydive\*\*](#) to a survival course and make this a memorable Christmas.
