

# VitaBrew Coffee Certifies Eight O'Clock Coffee and GNC Ultra Mega for FDA Label Compliant Vitamin Fortified Coffee Recipe

Released on: December 07, 2010, 5:03 am

Author: Edward Mugits

Industry: [Healthcare](#)

VitaBrew Coffee LLC released its Free Certified Healthy Coffee recipe to the general public with its Independent Consumer laboratory Approved ingredients. VitaBrew Coffee Founder, Edward Mugits, has placed the FDA compliant Ingredient label copy of their recipe for Eight O'Clock Coffee and GNC Ultra Mega Vitamin and Mineral fortified Coffee online for the general public and Crohn's Disease help.

VitaBrew Coffee promotes online healthy recipes to encourage the intake of critical nutrients through the most commonly consumed beverage in the world. "For many, coffee is a staple, states Edward, it's breakfast with or without a donut, muffin, toast or anything else, and for those who follow this dietary routine, the vast majority intake no supplements at all. I am one of those who placed less importance on nutrient intake than my morning coffee, and that morning brew took a lot more time than it takes to swallow a supplement. Is it a stigma with taking a pill, for many yes, but I call it lazy because I

didn't take them regardless of a reason, so I developed a [Healthy Coffee](#) for my nutritional intake and those who suffer from Crohn's Disease. Living with Crohn's disease is a whole different ball game, there are so many people afflicted with Crohn's Disease who simply cannot digest the supplements that Coffee, for those who can consume it, is a perfect vehicle to improve their nutrient intake through their mucous linings and digestive tract if liquefied and diluted.

Look on my [viatabrewcoffee](#) website and you will see other unique sources of nutrient intake vehicles, such as Vitamingum, a vitamin fortified chewing gum by Vitaball LLC, made for those who may not take supplements but chew gum and those who simply cannot take them orally. That little piece of gum was never developed for [Crohn's Disease help](#) or support, but it is helping and we thank Vitaball LLC for their continued expense in healthy products for those in need .

Why GNC? because their natural supplements are the most effective formulations that we found compared to 8 other leading manufacturers. GNC provides the consistent quality control that actually exceeds GMP standards and their supplements were the only one that passed 3 consecutive Independent Consumer laboratory tests through the High temperature brewing process. GNC continues to improve its formula and results may vary with the evolving Ultra Mega supplements. It was at GNC where we found the Vitamin Fortified Gum".

These statements are not endorsed by GNC, Eight O'Clock Coffee or the FDA, the FDA does not control the supplement requirements other than label claim. The [Vitabrew Coffee](#) recipes and the products and or information it places online are not to be construed as a cure, treatment or something prescribed to heal, treat or supplement any medically administered program, When in doubt, seek a physician's advice prior to trying anything new.
