

# Lottery.co.uk Launch Mobile Lottery Casino Site

Released on: January 19, 2011, 5:20 am

Author: [The Lottery Company Ltd](#)

Industry: [Entertainment](#)

Lottery.co.uk has launched a mobile version of the Lottery Casino website.

The mobile version of the Lottery Casino is suitable for any modern smartphone, including the iPhone, and although it has only recently been launched there are already seven fantastic games to choose from.

The main lobby at the mobile Lottery Casino is designed to help players view the available games and to launch users' chosen game with as little fuss as possible. It achieves this by listing the games and providing a graphical icon for each, along with a brief description of what each title involves. Both traditionalists and fans of the very latest games will be impressed with the titles that are available, which include Blackjack and Roulette as well as some of the latest generation slots games, such as Pharaoh's Fortune, Poseidon's Kingdom and THE SLOT, which has a thrilling horror theme.

Although smartphones have a lot less 'screen real estate' than desktop or laptop computers, that doesn't mean the games at the mobile Lottery Casino are in any way inferior to the games at the regular Lottery Casino. All of the [mobile casino games](#) here have been specifically designed to make the most out of modern smartphone technology, and users will not fail to be impressed by what has been achieved.

Whichever game users choose to play at the mobile Lottery Casino, they will find that the full-colour graphics are pin-sharp, the animation is smooth and the sound effects perfectly suited to the action taking place on the screen. Actions are taken with the touch of a fingertip, and a menu button offers access to information about the game being played as well as the chance to adjust settings, view individual accounts and deposit funds, to mention just a few of the options.

New players can get £2.50 free to try the games without having to deposit, so they won't need to risk a penny of their own cash to discover the mobile Lottery Casino experience. Those with an iPhone can get started by downloading the iPhone Lottery app, which not only allows users to check all of the latest [lotto results](#) but also includes an icon that directly links to the mobile Lottery Casino.
