Industry: [Entertainment](#)

DirectRooms.com confirms that the Munich Comic Festival will be coming to the historic German city between the 23rd and 26th June 2011.

Renowned as one of the premier comic festivals in all of Germany, the event will include a myriad of activities for participants and visitors alike. In addition to the trade fair that will provide the bulk of networking and entertainment during this event, the festival will feature international and national comic authors and publishers, signings by authors and publishers, and artwork displays, and a comic market.

The festival will also include exhibitions, art classes and workshops, and panel discussions about the current comic marketplace and the future of the market.

Each year the Munich Comic Festival grows in popularity as well as reputation. This year various museums throughout the city will hold comic-themed exhibitions in honour of the festival's run in Munich, and Munich's Department of Arts and Culture will be arranging the hosting of such exhibits throughout the city.

The celebration of comic art will take place this year at the historic Munich "Künstlerhaus am Lenbachplatz", one of the premier locations in the city for art exhibitions and conferences. Nestled near the heart

of the city square, this venue will provide a perfect backdrop for this exciting event.

[Hotels in Munich](#) offer accommodation for all tastes and budgets and are conveniently located near the venue for the festival as well as the heart of Munich's cultural centres.
