Industry: [Small Business](#)

Appliance repairs company 0800 REPAIR has called on the UK public to consider the option of repairing their broken-down washing machines rather than replacing them.

0800 REPAIR is one of the leading repair companies in the UK, having the ability to repair all kinds of washing machine faults. This includes drum and door gasket replacements, blocked pumps, snapped belts, heating issues and spin cycle faults.

The company can also work on a number of different brands, so practically all makes and models of washing machine can be easily fixed by 0800 REPAIR. Everything from AEG to Zanussi washing machines can be repaired, and you can view the full list of brands that 0800 REPAIR can work with by looking on the official website.

0800 REPAIR employs qualified engineers that have all undergone additional training to ensure that they are able to carry out appliance repairs in line with the company's standards. In order to save time for customers, 0800 REPAIR offers timeslot appointments for call-outs, so that customers can arrange their day around their washing machine repairs.

Paul Feek, Managing Director of 0800 REPAIR said: "We are able to provide washing machine repair throughout the UK, so no matter where you live we will be able to get an engineer out to you. Our

special Code of Conduct ensures that engineers arrive on time and that they keep you in the loop concerning your repairs, as we believe this is incredibly important.

“Also, because we understand that times are tough, you can get fixed price labour from 0800 REPAIR to help you to save money in the long-run. This means that, when it comes to washing machine repair, it really is cheaper to come to 0800 REPAIR instead of rushing out and buying a new machine.”
