Industry: [Sports](#)

Bobby Petrino has been linked to a second young lady for a text messaging-affair. Information on Alison Melder's modeling site claims for her to have won the title of Ms. Bikini-USA 2008. Bikini-USA would like to clear up this statement as it is not correct and respond to Claims of Involvement with Alison Melder.

April 13, 2012, 8:50 pm -- /[EPR NETWORK](#)/ -- When a scandalous news story breaks so many parties are involved and therefore, become breaking news headlines for many different reasons. Recently, Bobby Petrino has been linked with a motorcycle crash and having an affair with a 26 year old assistant who was with him on the day of the motorcycle accident. Petrino and this assistant shared supposedly thousands of text messages during their affair. Now, the latest hot topic with the [former Arkansas Razorback's Head Coach Petrino](#) is that he was also involved with a 26-year old woman, Alison Melder, during this same time period, and they also shared over 200 racy text messages during a two month period. Ms. Alison Melder may or may not have been involved with Mr. Bobby Petrino, I have no way of confirming their exchange of over 200+ text messages, nor is it any of my personal business just how many mistresses the now Former Arkansas Football Head Coach had in his life.

With the breaking story of [Alison Melder and Bobby Petrino's alleged affair](#), so many have wondered who is [Alison Melder](#) and what exactly is her involvement with former Arkansas Razorback's Football Coach Bobby Petrino? Also, surfacing in news headlines, [USA Today](#) and [Lost Lettermen](#), are claims made by Ms. Melder that she was the Miss Bikini-USA 2008 Bikini Model competition winner. Ms. Melder, on her modeling site, claims that she won the competition and title as Ms. Bikini-USA 08.

It is true that there is an organization called [Bikini-USA](#) with a website full of pages of gorgeous bikini models. Bikini-USA does hold various model competitions throughout the year and proudly hosts its annual competition in a unique, exotic location with various top photographers to shoot and help determine the [Ms. Bikini-USA for that year](#). I will say this, Ms. Alison Melder, although extremely attractive, is one bikini model, I will personally never work with. She has on her [personal profile](#) as of today on (www.talentfinder.tv/alison) under Awards / Credits: listing herself as Miss Bikini-USA 08 and for that reason alone, I would never work with a model like her. I personally know that this is not true, as I have been actively involved with Bikini-USA. What I can confirm is that Bikini Model [Ms. Alison Melder](#) was in no way the winner of the Miss Bikini-USA 2008 bikini model competition. This distinct title was awarded to the ever-so-lovely [Ms. Gia Allemand](#). You have to remember this beautiful and ever so graceful lady. She was one of [Jake Pavelka's favorites](#) on the ABC Show "The Bachelor – On the Wings of Love" season. I had the distinct privilege of doing a phone interview with Ms. Gia Allemand and I have to say that she is just as lovely in her demeanor on a phone interview as she is on TV. I could only hope to work with such a lovely bikini model down the road. I also had the privilege of putting together her photos and cover story for Bikini-USA (<http://www.bikini-usa.com/Gia-Allemand-Model-2008.asp>) while she was on "The Bachelor".

I also asked the Owner's of Bikini-USA, Jay and Terri Dingle, if they have ever had any knowledge of Alison Melder in any shape form or fashion. I've known both Jay and Terri for years, and they both told me that they just can't ever remember this one particular model. We are talking about two people who make it their business to personally get to know each and every bikini model who participates in any of their bikini model competitions. Bikini USA owners have been unable to identify Ms. Melder's involvement with their organization and have been unable to contact Ms. Melder to verify her claims.

The owners of Bikini USA are perplexed by their recent influx of media contacts for interview requests and additional information regarding Alison Melder, the "self-proclaimed winner" of Miss Bikini USA 2008.

"While it is possible Ms. Melder may have won a local photo submission contest, we have no record of her winning or entering an official Bikini USA contest. We do however consider all winners of any contest with which we are associated, part of the Bikini USA family and wish Alison the best in her current and future endeavors" stated Terri Dingle, part owner of the Bikini USA franchise.

Further, no Bikini-USA Staff photographer has any knowledge of Ms. Melder, and every Miss Bikini-USA Competition has a minimum of three Bikini-USA Staff Photographers on hand to work with, photograph and provide advice to all bikini models in their competitions. You see, not only do I participate in the web site portion of Bikini-USA, but I have also had the privilege to do model photography with them and proud to say that I have more than a few shots on record with them!

The owners of Bikini USA have also made attempts to contact Ms. Melder regarding her involvement with their organization and have been unsuccessful to date. The Bikini USA organization manages thousands of aspiring models and promotes them at events and various sponsored contests.

So I am confused and a tad dismayed that any reputable news agency is reporting that Ms. Alison Melder was the Former Miss Bikini-USA 2008 winner when all they had to do to fact check this was to either hit the [Bikini-USA site](#) ; email Jay and Terri Dingle; or that matter, give them a call.

Even furthermore, I can't confirm or deny that Ms. Alison Melder's claim to be Miss Motorcycle Mania 2008 is true or false. I can tell you this, after ten minutes of using a little known search engine called Google; I couldn't locate one official Motorcycle Mania website. I did however find a number of different websites that have added city names to that verbiage but not one for the supposed Miss Motorcycle Mania claim for 2008. My Dad always told me that where there's smoke there's fire. It would appear to me that knowing for a fact that Miss Alison Melder's claim to be Miss Bikini-USA 2008 as false; then I would say it's probably safe to presume that her claim for her other Awards is the same.

As for her [text messages](#) to a married man who was riding around on a motorcycle with a young lady that wasn't his wife, hey who am I to judge? As for USA Today and [other news agencies](#) that have the audacity to call themselves journalists, how about you guys spend at least the same 15 minutes I spent looking online to do at the very least a little fact checking first? I'm not even a seasoned reporter and even I know that much!
