West Chester, OH, May 02, 2012, 5:08 pm -- [/EPR NETWORK/](#) -- IceTech America, Inc., a world leader in manufacturing high performance Dry Ice Blasting and Dry Ice Production equipment is expanding to a new location in West Chester, OH. The response to growing demand for their blasting machines along with state of the art dry ice production equipment has prompted the move.

"Since expanding to the United States, we have seen growth every year" says Dennis Hjort, President/CEO of IceTech America, Inc. "With our growing presence in North America we have outgrown our current facility. This new facility at 5217 Muhlhauser Road, West Chester, OH will allow us the room we need to hire additional employees, expand our service department and continue to add value for our customers."

IceTech America, Inc. first opened their doors in April of 2006. With the expansion, IceTech America, Inc. will be more than doubling their campus. "We have our customers to thank for our continued growth", says Hjort. "We invest a lot of time and resources to build close working relationships with each of our customers, and we are seeing a lot of referrals and repeat business as a result."

With the new location IceTech America, Inc. will now host a state of the art training and conference center unmatched by any in the industry. "When our customers walk in the door, they will be very impressed" says Mr. Hjort. "The new location will offer an expanded service center along with room to meet our growing demand for more customized and automated solutions." Automated systems have

increased in demand over the last couple of years, and with the new facility IceTech is now capable to offer detailed engineered automated solutions for Dry Ice Blasting to their customers.

IceTech America, Inc. will also continue to stock every part for their blasting machines, and now will carry a complete line of parts needed for their pelletizers to continue to meet their guarantee shipment of parts within 24 hours.

Dry Ice Blasting is rapidly growing as a first choice cleaning method in all industries, from automotive to historical restoration. Dry Ice Blasting offers a non abrasive, non toxic, environmentally friendly cleaning method with zero secondary cleanup involved and no moisture. Dry Ice as a blasting media is approved by the USDA, EPA and FDA. IceTech offers the only line of blasting equipment that is approved and listed by UL.

IceTech America, Inc. has recently launched all new state of the art Dry Ice production equipment that is revolutionizing the industry from older technology to the 21st century. IceTech offers the fastest line of Dry Ice Production equipment in the industry.

IceTech was first founded in 1998 in Denmark. Since inception, IceTech has continued to change the industry while engineering the most versatile line of Dry Ice Blasting equipment and high performance Dry Ice Production equipment. IceTech has supplied equipment to over 180 countries around the world both directly and with their network of over 30 distributors. For more information, please visit www.icetechworld.com.
