

# BOC Sciences Released Analytical Support Services

Long Island City, New York, January 15, 2016 — /EPR NETWORK/ — Thursday of this week (January 14, 2016), BOC Sciences officially launched its analytical support service, aiming to provide all-round custom services on the base of its present services in pharmaceutical field.

The analytical service of BOC Sciences covers a wide range in almost every aspect of drug discovery from impurities identification, purity level testing, to right equipment suggestion for compound preparation with the aim of providing the best solutions for research conduction and maximizing the outcome with less waste in both time and cost.

Analysis service on inspecting the quality of compounds before, during, and after researches including their purity level, structure and degradation testing, final chemicals analysis, even involved equipment suggesting are available. "The launch of analytical service is an upgrade of the present customer services like drug design, compound manufacturing, but making the analysis outstand to meet pure needs in this aspect, with which the companies that carry out researches in a single direction can benefit from our comprehensive expertise network." Said Daylen, the director of the newly funded business department, "and we will continue to optimize our professionalism in the field to serve more clients in such tailored needs."

Besides, the analytical support (<http://www.bocsci.com/analytical-support.html>) additionally includes but not limited to mass spectrometry, nuclear magnetic resonance, and X-ray crystallography. Other technologies like chemistry synthesis and bioconjugation involved analysis needs can be also met at BOC Sciences

With the development of pharmaceutical industry, numerous studies and researches on material and new formulation are undergoing, the appearance of BOC Sciences' analytical support services can be considered as an outsource route for companies that are not willing to spare more time and budget on some sub-matters, and such custom services can contribute to a purer research with

no further distraction while obtain the highest level of expertise in related matters.

This form of analytical service will get furtherly developed as the general environment put more emphasis on the idea that professional problems should be done by professional people with the best result while keep efficient.

### **About BOC Sciences**

BOC Sciences (<http://www.bocsci.com>) is original a chemical supplier on APIs, natural compounds, chiral compounds, inhibitors, GMP products and many other chemicals. But in recent years, the company gradually takes more effort on providing related custom services like synthesis, drug discovery and so on to be a comprehensive products and services supplier in the field.
